This timetable contains passenger and mail train services, together with associated stock and locomotive movements. The importance of these services dictates that the planned working of these trains must always be maintained.

NOTES

- i. The four digit codes shown in columns above train titles are for train reporting. The first position indicates the classification, the second the destination indication (see section below), the third and fourth positions the identity number of the train.
- ii. Where no separate time is shown for arrival and departure, the time indicated is the departure time. Timings in *italics* indicate passing times.
- iii. Trains must leave at the advertised times wherever practicable. Where the advertised departure times of passenger trains are slightly earlier than those shown in the Working Timetable, the former must be used in all quotations to the public.
- iv. A half minute is allowed for station duties on passenger train services, unless separate arrival and departure times are provided, or more time is specified by letter indications (see section below).
- v. All dates shown herein are inclusive.

DESTINATION INDICATIONS

Letter Destination area or service group

- A Aberdeen
Glasgow Central / Barrhead / Kilmarnock / Ayr / Stranraer services
- B Edinburgh
Bathgate / Edinburgh / Newcraighall services
Certain Glasgow suburban services (mainly to Lanark)
- C Certain Glasgow suburban services
- D Glasgow Central / Paisley Canal services
Motherwell / Cumbernauld services
- E Long distance services terminating in former London North Eastern region
Certain Glasgow suburban services (mainly to / from Balloch)
- F Certain Glasgow suburban services
- G Glasgow Central / Gourrock services
Certain Edinburgh / Fife Circle suburban services
- H Inverness (including all North Highland services in both directions)
Certain Glasgow suburban services (mainly to / from Helensburgh Central)
- I Cathcart Circle "inner" (anti-clockwise) services
- J Glasgow Central / East Kilbride services

Glasgow Queen Street / Anniesland (via Maryhill) services
- Y West Highland Line services
Edinburgh / North Berwick services
Edinburgh / Glasgow Central via Shotts services

TIMING LOADS

The timing load at the head of a unit operated train indicates the class of unit on which the timing of the train is

based, and will be one of the following:

150	Class 150, 153 or 156 DMU (75 mph)
158	Class 158 DMU (90 mph)
170	Class 170 DMU (100 mph)
220	Class 220 'Voyager' DMU (125 mph)
221 or 221T	Class 221 'Voyager' tilting DMU (125 mph) ('T' indicates timed using tilt speed sectional running times)
322	Class 322 EMU (100 mph)
390-125	Class 390 'Pendolino' tilting EMU (125 mph)
75EMUAC	Class 314, 318, 320 or 334 EMU timed at a maximum speed of 75 mph

The timing load for locomotive hauled trains is shown in the following format:

- Maximum speed of the train, *followed by*
- The class of locomotive, *followed by*
- The tonnage on which the timings are based

For example, **80-86595** indicates a train timed at a maximum speed of 80mph, hauled by one (or more) Class 86 locomotive, with a maximum tonnage of 595 tonnes.

GNER locomotive hauled Mark 4 sets are shown with a timing load of **12591410** (i.e. 125 mph speed, class 91 loco and a trailing load of 410 tonnes, equivalent to 9 vehicles).

Services conveying Sleeping Cars are indicated by "**Sleepers**" under the train's trailing load. Where the tonnage is not a relevant factor, e.g. light movements, the letters **LD** ('Light Diesel') or **LE** ('Light Electric') appear followed by the maximum speed.

PLATFORMING

Please note that platforms are not shown in this WTT for Glasgow Central or Glasgow Queen Street (High Level stations). For Glasgow Central platforms, please refer to the "Glasgow Central Platforming Arrangements Docker" for full details. Full details of platform arrangements for services to / from Glasgow Queen Street High Level are shown in the Section GC WTT.

Platforms are shown for certain other terminating and important intermediate stations, where this information has been provided.

EXPLANATION OF REFERENCES

Days run

M	Monday	F	Friday
T	Tuesday	S	Saturday
W	Wednesday	Sun	Sunday
Th	Thursday		

O The addition of the letter 'O' indicates that the train will run on that day or those days only

X The addition of the letter 'X' indicates that the train will not run on that day or those days

EWD Runs every week day (Monday to Saturday)

Where * * appear in the column heading either side of the day(s) run, this indicates that the train starts its journey on the previous day, as indicated in the "Orig. Dep. Time" heading. The days shown in the "Dates of Operation" heading indicate the actual days of operation applicable to that station bank.

Timing Differentials

Differences between arrival and departure times, or differences between Working and Advertised (Public) arrival or departure times are indicated by one or more of the following codes:

a	Arrives 1 minute earlier	f	Arrives 3½ minutes earlier
b	Arrives 1½ minutes earlier	g	Arrives 4 minutes earlier
c	Arrives 2 minutes earlier	h	Arrives 4½ minutes earlier
d	Arrives 2½ minutes earlier	j	Arrives 5 minutes earlier
e	Arrives 3 minutes earlier		

p	Advertised departure time 1 / 1½ minutes earlier
q	Advertised departure time 2 / 2½ minutes earlier
r	Advertised departure time 3 / 3½ minutes earlier
v	Advertised arrival time 1 minute later
w	Advertised arrival time 1½ / 2 minutes later
y	Advertised arrival time 2½ / 3 minutes later
z	Advertised arrival time 3½ / 4 minutes later

Margins and allowances

[4] Extra time, shown in minutes, for temporary speed restrictions and other engineering work

(2) Extra time, shown in minutes, for pathing requirements

<1> Extra time, shown in minutes, for performance requirements

Running Lines

- CDL** Clydesdale Line
- DL** Down Line
- DPL** Down Passenger Loop
- DGL** Down Goods Loop
- FL** Fast Line
- SL** Slow Line
- TS** Through Siding
- UL** Up Line
- UPL** Up Passenger Loop

Operating Characteristics

D	Driver Only operated
E	Electric train conveying Mk 4 coaches
M	Must only convey vehicles authorised to operate at 110 mph or more
P	Push and pull train
Q	Runs when required
Sleepers	Conveys Sleeping Cars (maximum speed 80 mph) and seated accommodation (unless otherwise stated)
Steam	Usually hauled by steam locomotive
Y	Runs to and from terminals as dictated by traffic demand
