This timetable contains passenger and associated empty stock workings for train services in the North Wales, South Cheshire and Merseyrail Electrics area. The importance of these services dictates that the planned working of these trains must always be maintained.

NOTES

- I. The codes shown in columns above train titles are for train reporting. The first position indicates the classification, the second the destination indication, the third and fourth positions the identity number of the train.
- II. Where no separate time is shown for arrival and departure the time indicated is the departure time. Figures in *italics* indicate passing times.
- III. Trains must leave at the advertised time whenever practicable but, when booked to set down only, may depart as soon as station duties have been completed. Where the advertised departure times of passenger trains are slightly earlier than those shown on the Working Timetable, the former must be used in all quotations to the public.
- IV. A half minute is allowed for station duties, unless separate arrival and departure times are provided or more time is specified by letter indications.
- V. All dates shown herein are inclusive.

TIMING LOADS IN WORKING TIMETABLES

The timing load at the head of a unit operated train indicates the class of unit on which the timing of the train is based, and will be one of the following:

142	Class 14x series DMU
150	Class 150, 155 or 156 DMU
153	Class 153 DMU
158	Class 158 DMU
175	Class 175 DMU
221T	Class 221 DMU timed at tilt speed on sections of route where tilt is authorised
390-125	Class 390 'Pendolino' EMU timed at 125 mph (with tilt, on sections of route where tilt is authorised)
390+57	Class 390 'Pendolino' EMU diesel hauled by Class 57 locomotive
75EMUDC	Class 507 or 508 EMU operating on third rail sections
@	Indicates change of timing load at location en-route – refer to column note

The timing load for locomotive hauled trains is shown in the following format:

- Maximum speed of the train, *followed by*
- The class of locomotive, *followed by*
- The tonnage on which the timings are based

For example, **10067140** indicate a train timed at a maximum speed of 100mph, hauled by one (or more) Class 67 locomotive, with a maximum tonnage of 140 tonnes.

Where the tonnage is not a relevant factor, e.g. light movements, the letters **LD** ('Light Diesel') or **LE** ('Light Electric') appear followed by the maximum speed.

EXPLANATION OF REFERENCES

Days run

M	Monday	F	Friday
T	Tuesday	S	Saturday
W	Wednesday	Sun	Sunday
Th	Thursday		

O The addition of the letter '**O**' indicates that the train will run on that day or those days only

X The addition of the letter '**X**' indicates that the train will not run on that day or those days

BHX Does not run on Bank Holidays

EWD Runs every week day (Monday to Saturday)

Where * * appear in the column heading either side of the day(s) run, this indicates that the train starts its journey on the previous day, as indicated in the "Orig. Dep. Time" heading. The days shown in the "Dates of Operation" heading indicate the actual days of operation applicable to that station bank.

Timing Differentials

Differences between arrival and departure times at locations where only a single line of entry is given are indicated by one of the following codes:

a	Arrives 1 minute earlier	f	Arrives 3½ minutes earlier
b	Arrives 1½ minutes earlier	g	Arrives 4 minutes earlier
c	Arrives 2 minutes earlier	h	Arrives 4½ minutes earlier
d	Arrives 2½ minutes earlier	j	Arrives 5 minutes earlier
e	Arrives 3 minutes earlier		

For differences of more than 5 minutes, a foot or column note is given.

For differences between Working and Advertised (Public) arrival or departure times, different codes are used. Please note that, in any case, Working departure times containing a ½ minute are always rounded down to the whole minute when quoted to the public, and Working arrival times containing a ½ minute are always rounded up to the whole minute. For example, a WTT departure time of 12.52½ will be shown as 12.52 in a public timetable. A WTT arrival time of 14.33½ will be shown as 14.34 in a public timetable. Exceptions to this are indicated by one of the following codes:

k	Advertised arrival time ½ / 1 minute earlier
l	Advertised arrival time 1½ / 2 minutes earlier
m	Advertised arrival time 2½ / 3 minutes earlier
p	Advertised departure time 1 / 1½ minutes earlier
q	Advertised departure time 2 / 2½ minutes earlier
r	Advertised departure time 3 / 3½ minutes earlier
v	Advertised arrival time 1 minute later
w	Advertised arrival time 1½ / 2 minutes later
y	Advertised arrival time 2½ / 3 minutes later
z	Advertised arrival time 3½ / 4 minutes later

Margins and allowances

- [4]** Extra time, shown in minutes, for temporary speed restrictions and other engineering work
- (2)** Extra time, shown in minutes, for pathing requirements
- <1>** Extra time, shown in minutes, for performance requirements
