NOTES

- I. The four digit codes shown in columns above train titles are for train reporting. The first position indicates the classification, the second the destination indication (see below), the third and fourth positions the identity number of the train.
- II. Where no separate time is shown for arrival and departure the time indicated is the departure time. Figures in *italics* indicate passing times.
- III. Trains must leave at the advertised time whenever practicable but, when booked to set down only, may depart as soon as station duties have been completed. Where the advertised departure times of passenger trains are slightly earlier than those shown on the Working Timetable, the former must be used in all quotations to the public.
- IV. A half minute is allowed for station duties, unless separate arrival and departure times are provided or more time is specified by letter indications.
- V. All dates shown herein are inclusive.

TIMING LOADS IN WORKING TIMETABLES

The timing load at the head of a unit operated train indicates the class of unit on which the timing of the train is based, and will be one of the following:

142	Class 14x series DMU
150	Class 150, 155 or 156 DMU
153	Class 153 DMU
158	Class 158 DMU
170	Class 170 DMU
185	Class 185 DMU
221	Class 220 'Voyager' DMU or Class 221 'Voyager' DMU operating in non-tilt mode
221T	Class 221 'Voyager' DMU timed at tilt speed on sections of route where tilt is authorised
222	Midland Mainline Meridian
222-9	Midland Mainline Meridian 9 Car
321	Class 321 EMU
321-C	Class 321 EMU-C
323	Class 323 EMU
325	Class 325 EMU
HST7-125	High Speed Train (2+7) (125 mph)
HST8-110	High Speed Train (110 mph)
HST9-125	High Speed Train (2+9) (125 mph)
@	Indicates change of timing load at location en-route – refer to column note

The timing load for locomotive hauled trains is shown in the following format:

- Maximum speed of the train, *followed by*
- The class of locomotive, *followed by*
- The tonnage on which the timings are based

For example, **80-86595** indicates a train timed at a maximum speed of 80mph, hauled by one (or more) Class 86 locomotive, with a maximum tonnage of 595 tonnes.

Where the tonnage is not a relevant factor, e.g. light movements, the letters **LD** ('Light Diesel') or **LE** ('Light Electric') appear followed by the maximum speed.

EXPLANATION OF REFERENCES

Days run

M	Monday	F	Friday
T	Tuesday	S	Saturday
W	Wednesday	Sun	Sunday

Where * * appear in the column heading either side of the day(s) run, this indicates that the train starts its journey on the previous day, as indicated in the "Orig. Dep. Time" heading. The days shown in the "Dates of Operation" heading indicate the actual days of operation applicable to that station bank.
