**Commentary on the Sussex Timetable Planning Rules 2021  
Version 2.0  
Final Proposal for Principal Change Timetable 2021**

This document is a covering note for the Timetable Planning Rules – Final Proposal for Principal Change 2021 - and provides a specific commentary to the route described above.

In the Timetable Planning Rules document each change in content is indicated by the following convention:

New or Amended text is red
<del>Deleted text is green and struck through</del>

The change is also highlighted with a thick vertical line at the right hand side of the page.

The following is a summary of changes in content from Version 1 of the 2021 Timetable Planning Rules.

---

## 1. Introduction and General Notes

### 1.1 Index of Routes

No change

### 1.2 Sectional Appendices and Rule Book

No change

### 1.3 Definitions

#### 1.3.1 Train Classification

Additions and changes to Class 9 TID's

#### 1.3.4 Line Codes

No change

#### 1.3.5 Activity and Other Codes

No change

---

## 2. Route Description

### 2.1 Planning Geography

Formatting of the whole of section 2.1 has been updated to reflect the amended definitions added at the start of section 2.1. Formatting has been introduced to allow easy identification of locations which are conditional timing points with a mandatory element. These changes are replicated across all Route TPR documents for consistency. For clarity in the TPR document the amended definitions are shown in either green strikethrough or red font as usual, but changes are only highlighted in green strikethrough or red font on individual Lines of Route where there is an additional change to the geography as detailed elsewhere in this commentary letter.

Missing Line reference code information inputted across various locations:

**SO250** – Additions in “Code and Notes” columns

**SO250B** – Timing Point naming update

**SO500** – Additions in terms of line codes, and “Code and Notes” columns

**SO500** - Copyhold Junction line code changes from UV/DV to ULH/DLH.  
Suggestion of DL and UL not available as used already on the ELL

**SO500** – Haywards Heath additional line codes

**SO630** – Littlehampton Washer Road addition

**SO680** – “Notes” section additional wording

### 2.2 Route Opening Hours

No change

## 3. Electrification

### 3.1 Electrification Limits

No change

### 3.2 Electrification Supply Restrictions

No change

## 4. Rolling Stock Restrictions

### 4.1 Locomotive Route Availability

No change

#### **4.2 Passenger Stock Restrictions**

No change

#### **4.3 Freight Wagon Restrictions**

No change

#### **4.4 Freight Train Load Limits**

No change

#### **4.5 Freight Train Length Limits**

No change

#### **4.6 Driver Only Operation Limits**

No change

#### **4.7 Engineers' Trains Restrictions**

No change

### **5. Running Times, Margins and Allowances**

#### **5.1 Sectional Running Times**

No change

##### **5.2.1 Headways**

Wording amendments to the standards

**SO600** – additional value and comments added in “notes” section

**SO630** – additional value and comments added in “notes” section

##### **5.2.2 General Capacity Constraints**

No change

#### **5.3 Junction Margins and Station Planning Rules**

Standard values – Minimum additions/removals and wording amendments inclusive of Platform ReOccupation value

**SO250** - North Pole Signal VC813 - additional train class added

**SO250** - North Pole Signal VC818 - additional train class added

**SO500** - London Victoria Central - Berthing Facility update

**SO500** - Battersea Park - Junction Margin additions

**SO500** – Clapham Junction - removal of Class 442 detail

**SO500** – Wandsworth Common - new entry/planning note

**SO500** – Balham – Junction Margin additional wording and Planning Note

added

**SO500** Streatham Common - Adjustment to Sectional Running Time, Length limit changes and additional Planning Note added

**SO500** – Selhurst - Planning Note added

**SO500** – Selhurst T&R.S.M.D - Length Limit addition

**SO500** East Croydon - removal of Class 66 adjustment and also Class 442 references

**SO500** - South Croydon – Adjustment to Sectional Running Time changes

**SO500** Purley - wording around Class 66's and Junction Margin value change

**SO500** Redhill - Adjustment to Sectional Running Times and Berthing changes along with removal of Platform Reoccupation as covered within the standards

**SO500** – Gatwick Airport – total new entry and deletion of old entry

**SO500** – Gatwick Airport CHS – new entry (formerly part of old Gatwick entry)

**SO500** – Three Bridges – Berthing facilities notes update and removal of reference to Platform Reoccupation as covered within the standards

**SO500** Haywards Heath - addition of opposing movement departures

**SO510** – London Bridge - Platform Restriction removals

**SO510** – Brockley – new entry for Planning Note

**SO510** – Honor Oak Park – new entry for Planning Note

**SO510** – Forest Hill – new entry for Planning Note

**SO510** – Penge West – new entry for Planning Note

**SO510** – Anerley – new entry for Planning Note

**SO510** – Norwood Junction wording change

**SO530** - Oxted - Planning Note wording amendment

**SO560** – Edenbridge – Operational Restrictions wording change

**SO590** – Plumpton – new entry for Planning Note

**SO590** – Cooksbridge– new entry for Planning Note

**SO590** – Lewes– Signal number changes and Simultaneous Moves Not Permitted wording additions

**SO590** – Southerham Junction – signal number change

**SO590** – Glynde – removal of reference to Class 442's

**SO590** – Berwick – removal of reference to Class 442's

**SO590** – Polegate – additions for Simultaneous Moves Not Permitted and Planning Note

**SO600** - addition under Simultaneous Moves Not Permitted

**SO620** – London Road - new entry for Planning Note

**SO620** – Moulseccomb - new entry for Planning Note

**SO620** – Falmer - new entry for Planning Note

**SO620** – Brighton Wall Sidings – new entry for Berthing Facilities

**SO620** – Hove – Berthing Facilities update

**SO620** – Aldrington – new entry for Planning Note

**SO620** – Southwick – new entry for Planning Note

**SO620** - Shoreham By Sea – Berthing facilities addition

**SO620** – East Worthing – new entry for Planning Note

**SO620** – West Worthing – new entry for Berthing Facilities

**SO620** – Angmering – new entry for Berthing Facilities

**SO650** – West Norwood Junction – removal of Simultaneous Moves Not Permitted

**SO650** – West Norwood – Planning Note addition

**SO650** – Gipsy Hill – new entry for Planning Note

**SO650** – Crystal Palace – wording addition and new entry for Planning Note

**SO680** – Tulse Hill - Simultaneous Moves Not Permitted removed and Planning Restriction added

**SO680** – Streatham South Junction Length Limit additions

**SO700** – Wimbledon – Planning Note added

## **5.4 Platform Lengths**

Betchworth length change

#### **5.4.1 Loop Lengths**

No change

#### **5.5 Timing Allowances**

No change

##### **5.5.1 SX Daytime**

No change

##### **5.5.2 SX Night Time**

No change

##### **5.5.3 SO Daytime**

No change

##### **5.5.4 SO Night Time**

No change

##### **5.5.5 Sundays Daytime**

No change

##### **5.5.6 Sundays Night Time**

No change

## **6 Timing Considerations**

#### **6.1 Advertised and Working Times**

No change

#### **6.2 Timing of Light Locomotives**

No change

---

These represent the revised Timetable Planning Rules (the “Principal Rules”) for the Final Proposal for Principal Change 2021 timetable in accordance with Part D of the Network Code, Condition D2.2.3.

As per Condition D2.2.4 of Part D of the Network Code, following distribution of the Final Rules and by D-54, Timetable Participants may make representations to Network Rail in respect of any changes they propose or objections they may have to the Final Rules provided to them in accordance with D2.2.3.

Please send any responses to [michael.fox@networkrail.co.uk](mailto:michael.fox@networkrail.co.uk) as soon as possible in order that any queries and concerns can be dealt with in advance of the publication of the Final Rules at D-44. It is appreciated that this might not be achievable in all cases and this request does not affect any timetable participant's ability to respond after D-44 in accordance with Network Code D2.2.4 and 2.2.5.

Regards

# 1 Introduction and General Notes

Network Rail provide the Timetable Planning Rules document to Train Operators and other interested parties to set out the rules which are applicable to Bids for scheduling of train paths on the Network Rail network. Separate sections of Timetable Planning Rules are prepared for each Route with a National Timetable Planning Rules document setting out procedures to be followed and other nationally applicable rules.

Network Rail will determine the contents of Timetable Planning Rules through consultation with Train Operators with the primary aim of achieving the optimal balance between access to the network for train operations and performance robustness of the resulting train plan. This consultation is in line with the Network Code Part D, and Train Operators have a right of appeal to Timetabling Sub-Committee against the contents of the Final Timetable Planning Rules.

Final Timetable Planning Rules are issued with timetable Bidding Information before the commencement of the development period for the Principal Change timetable to which the Rules apply and cover a 12-month period. Revised Timetable Planning Rules are issued with timetable Bidding Information before the commencement of the Subsidiary Change timetable development period and show changes applicable to the Subsidiary Change timetable period which has been agreed since the issue of the annual Timetable Planning Rules.

Timetable Planning Rules may be changed only through this twice-yearly process or by the change procedure described in the National Timetable Planning Rules.

Train Operators' Bids for train paths must be compliant with Timetable Planning Rules. If a Train Operator wishes to submit a Bid for a train path which is not compliant with Timetable Planning Rules, they should consult the Network Rail Operational Planning team to establish whether an amendment to Timetable Planning Rules is likely to be agreed and, if appropriate, submit an amendment proposal which will be considered by Network Rail in accordance with the Change Procedure set out in the National Timetable Planning Rules. The Timetable Planning Rules amendment proposal should be submitted to Network Rail as early as possible and certainly no later than the time of submission of the Bid. If the proposed change is likely to involve the calculation of new sectional running times or a physical investigation then the Train Operator should liaise with the Operational Planning team to establish a realistic timescale for evaluation of the proposed change before submission of the Bid.

## 1.1 Index of Routes

Information arranged on a line of route basis in this document is presented in the following order:

SO250	Factory Bridge Junction to Mitre Bridge Junction
SO250A	Grosvenor Bridge Junction to Factory Junction
SO250B	Battersea Pier Junction to Longhedge Junction
SO250C	Pouparts Junction to Longhedge Junction
SO250D	Falcon Junction to Latchmere Junction (No1)
SO500	London Victoria to Brighton
SO500A	Selhurst Junction to Gloucester Road Junction
SO500B	Copyhold Junction to Ardingly
SO500C	Preston Park to Hove
SO510	London Bridge to Epsom Downs
SO510A	Sydenham to Crystal Palace
SO510B	Norwood Junction to Windmill Bridge Junction
SO520	Three Bridges to Havant (via Horsham)
SO520A	Ford Junction to Littlehampton Junction
SO530	South Croydon Junction to East Grinstead
SO540	Hurst Green Junction to Uckfield
SO550	Redhill to Tonbridge
SO560	Redhill to Gomshall
SO590	Keymer Junction to Eastbourne
SO600	Willingdon Junction to Ashford International
SO610	Appledore to Lydd Town
SO620	Brighton to Seaford
SO620A	Newhaven Harbour Junction to Newhaven Marine
SO630	Brighton to Littlehampton
SO640	Barnham to Bognor Regis
SO645	Battersea Park to Peckham Rye (Atlantic Lines)
SO650	Balham Junction to Beckenham Junction
SO650A	Bromley Junction to Norwood Junction
SO660	Purley to Caterham
SO660A	Chipstead Line Junction to Tattenham Corner
SO680	South Bermondsey Junction to Horsham
SO680A	Herne Hill to Tulse Hill
SO680B	Tulse Hill to Leigham Junction
SO680C	Tulse Hill to West Norwood Junction
SO680D	Streatham Junction to Streatham Common
SO680E	Streatham North Junction to Streatham South Junction
SO700	Streatham South Junction to Sutton (via Wimbledon)
EA1325A	Highbury and Islington to New Cross Gate (Values for TfL Infrastructure determined in conjunction with TfL – Boundaries shown in section 2.1)
EA1325B	Canal Junction to New Cross Gate (Values for TfL Infrastructure determined in conjunction with TfL – Boundaries shown in section 2.1)
EA1327	Surrey Quays (Silwood Junction) to Old Kent Road Junction (Values for TfL Infrastructure determined in conjunction with TfL – Boundaries shown in section 2.1)

## 1.2 Sectional Appendices and Rule Book

### 1.2.1 Sectional Appendix

The Sectional Appendix to the Working Timetable and Books of Rules and Regulations shall be used.

The Sectional Appendix is the sole source of information regarding the following:

Electrification limits refer to relevant Table 'A'

Permissive Working refer to relevant Table 'A', then see below.

Route Clearance refer to 'tab' associated with relevant Table 'A'

To identify the type of Permissive Working that applies at a given location refer to the appropriate Sectional Appendix Table A for that location. If there is authority for Permissive Working, this will appear in the Signalling and Remarks. There are different authorities that depend upon the signalling and layout of the location. The following list identifies the types of Permissive Working that will appear in the Sectional Appendix.

Type	Description
PP	Permissive Working – Full use for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – A	Permissive Working – Attaching and Detaching use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – C	Permissive Working – Contingency use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – S	Permissive Working – Platform Sharing use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PF	Permissive Working – For class 3 to 8 and 0 trains

Source: Sectional Appendix – General Instructions – National - Explanation of Table A terms and symbols

### 1.2.2 Rule Book

The following Modules of the Rule Book GE/RT8000 affects all sections unless specified. The sections listed affect railway operations and train movements. The listed section does not apply to Train Planning directly, but its application will affect how trains operate, and it is for that reason the item appears here.

RULE BOOK MODULE	SECTION	NOTES
G1 General safety responsibilities and personal track safety for non-track workers	5.5 Using the phonetic alphabet;	Operational Principals
OTM Working of on-track machines (OTM)	2.2 Before starting a journey	Timetable Planning Rules Section 4.6
	5.6 Carrying out a running brake test	Timetable Planning Rules Section 5.1.2
P1 Single line working	6.5 Warning anyone working on or near the line used for single line working	When planning Single Line Working
	9.3 Right-direction movements	
	9.4 Wrong-direction movements	
S1 Signals and indicators controlling train movements		Operational Principals
S2 Observing and obeying fixed signals	3.1 Passenger train at a position-light, shunt-ahead or shunting signal	Operational Principals
SP Speeds	2.4 Differential permissible speed indicators	Timetable Planning Rules Section 5.1.2
	2.5 Permissible speed indicators with letters	Timetable Planning Rules 5.1.2

RULE BOOK MODULE	SECTION	NOTES
	2.6 Enhanced permissible speed (EPS) indicators	Timetable Planning Rules 5.1.2
T11 Movement of engineering trains and on-track plant under T3 arrangements	3 Movements entering the possession	When planning trains entering possessions
	7 Instructing the driver or machine controller	When planning trains entering possessions
TW1 Preparation and movement of trains General	7.1 Authority and arrangements for movements (Hauling dead traction units)	Operational Principals
TW2 Preparation and movement of multiple-unit passenger trains	6.5 Carrying out a running brake test	Timetable Planning Rules Section 5.1.2
TW3 Preparation and movement of locomotive hauled trains (including HSTs, push-pull, postal, parcels)	2.1 Locomotives running light or hauling trains (Maximum speed of);	Timetable Planning Rules Section 5.1.2
	2.2 Maximum permitted speed of locomotive-hauled trains	Timetable Planning Rules Section 5.1.2
	2.3 Electric-traction speed restrictions	Timetable Planning Rules Section 5.1.2
	3.16 Carrying out a running brake test	Timetable Planning Rules Section 5.1.2
	Section 14.1 Working trains with locomotives at both ends, when this type of working is permitted	Operational Principals
Rule Book Handbook 5 Hand Signalling Duties	Section 5.2 Entrance signal	When planning Temporary Block Working (TBW)
	5.3 Exit signal	When planning Temporary Block Working (TBW)
	5.4 Where TBW is divided into two sections	When planning Temporary Block Working (TBW)

## 1.3 Definitions

The list below is not an exhaustive one but is intended to give readers an understanding of some of the terminology as used for the purposes of this document.

If any term in Timetable Planning Rules is unclear please contact the compiler on the telephone number shown on the cover.

### 1.3.1 Train Classification

Classification	Description
1	Express passenger train; or Nominated postal or parcels train; or Breakdown or overhead line equipment train going to clear the line or returning from there (1Z99); or Traction unit going to assist a failed train (1Z99) Snow plough going to clear the line (1Z99)
2	Ordinary passenger train; or Breakdown or overhead line equipment train not going to clear the line (2Z99) Officers' special train (2Z01)
3	Freight train which can run at more than 75 mph; or A parcels train; or Empty coaching stock train if specially authorised or Sandite (M P V)
4	Freight train which can run up to 75 mph
5	Empty coaching stock train
6	Freight train which can run up to 60 mph
7	Freight train which can run up to 45 mph
8	Freight train which can run at, or is timed to run at, 35 mph or less
9	London Overground East London Line services and Thameslink services
0	Light locomotive or locomotives

## FOUR CHARACTER TRAIN NUMBERING SYSTEM

Inserted at the head of each timing column in the Working Timetable and Special Notices is a train number composed of four characters.

### FIRST AND SECOND CHARACTER

The first character is a number indicating the classification of the train in accordance with industry standards (GE/RT8000 etc).

The second character is a letter indicating the routing or service group to which that train belongs.

The tables below indicate the passenger train numbering principals for classes 1, 2 and 9.

TID	Class 1 services (WTT)
1Axx	London Victoria and Brighton (fast) – not to be used for Gatwick Express services
1Bxx	London Victoria/London Bridge and Bognor Regis/Portsmouth Harbour via Three Bridges and Horsham
1Cxx	Horsham and Bognor Regis/Portsmouth Harbour (portion of 1Bxx / 1Jxx)
1Dxx	London Victoria and Gatwick Airport DOWN DIRECTION London Waterloo and Dorking via Epsom (Class 2 not available)
1Exx	London Bridge and Uckfield
1Fxx	London Victoria/London Bridge and Eastbourne / Hastings / Ore / Seaford
1Gxx	Brighton and Hastings

TID	Class 1 services (WTT)
1Hxx	London Victoria/London Bridge and Littlehampton via Hove
1Ixx	London Victoria and Sutton / Epsom / Dorking / Horsham via Mitcham Junction (semi-fast) <i>Stops ONLY at Clapham Junction between London Victoria and Streatham North Junction, regardless of its booked line</i>
1Jxx	London Victoria/London Bridge and Southampton Central via Three Bridges and Horsham
1Kxx	London Bridge and Epsom / Guildford via West Croydon (semi-fast)
1Lxx	London Victoria and East Grinstead
1Mxx	Brighton and London Victoria (Gatwick Express) UP DIRECTION
1Nxx	Brighton and Southampton Central via Swanwick
1Oxx	Reading and Redhill / Gatwick Airport West of England / South Wales to Brighton via Salisbury and Havant
1Pxx	London Bridge and Caterham (semi-fast)
1Qxx	Network Rail Test Trains
1Rxx	London Victoria and Reigate
1Sxx	Brighton and Portsmouth Harbour
1Txx	London Victoria and Gatwick Airport/Three Bridges via Redhill
1Uxx	Gatwick Airport and London Victoria (Gatwick Express) UP DIRECTION
1Vxx	Gatwick Airport / Redhill and Reading Brighton and West of England / South Wales via Salisbury and Havant
1Wxx	London Victoria and Brighton (Gatwick Express) DOWN DIRECTION
1Xxx	NOT USED
1Yxx	Brighton and Southampton Central via Eastleigh (1Y50 to 1Y99 range) London Victoria and Caterham (1Y00 to 1Y49)
1Zxx	Special Traffic/Charter services

TID	Class 2 services (WTT)
2Axx	Redhill and Tonbridge
2Bxx	Victoria and Sutton / Epsom Downs via Balham and Selhurst East/South Croydon and London Victoria via Selhurst and Balham (stopping) UP DIRECTION
2Cxx	Brighton and Seaford
2Dxx	Eastbourne / Hastings and Ashford International London Waterloo and Guildford via Epsom (Class 1 not available)
2Exx	Brighton and Littlehampton Clapham Junction and Shepherds Bush (ARL services only)
2Fxx	London Victoria and London Bridge via Crystal Palace
2Gxx	Brighton and Ore London Bridge and Caterham via Sydenham (stopping)
2Hxx	London Bridge and Beckenham Junction
2Ixx	London Victoria and Sutton / Epsom / Dorking / Horsham via Mitcham Junction (stopping) <i>Stops at additional stations other than just Clapham Junction between London Victoria and Streatham North Junction and is booked to use the Slow Line</i>
2Jxx	London Bridge and Caterham via Tulse Hill and Selhurst

TID	Class 2 services (WTT)
2Kxx	London Victoria and West Croydon via Crystal Palace
2Lxx	Brighton and Lewes Clapham Junction to Stratford via Willesden Junction
2Mxx	East Croydon and Watford Junction / Milton Keynes Central
2Nxx	Brighton and Hove
2Oxx	Milton Keynes Central / Watford Junction and East Croydon London Victoria and East Croydon via Balham and Selhurst (stopping) DOWN DIRECTION Reading and Redhill / Gatwick Airport
2Pxx	Purley and Tattenham Corner (portion working with London Bridge – Caterham services) Littlehampton and Bognor Regis
2Qxx	Network Rail Test Trains
2Rxx	Redhill and Reigate
2Sxx	Littlehampton and Portsmouth & Southsea London Bridge and Sutton via Sydenham and West Croydon (stopping)
2Txx	London Bridge and Coulsdon Town or Sutton via Sydenham
2Uxx	Brighton and West Worthing
2Vxx	Gatwick Airport / Redhill and Reading
2Wxx	London Bridge and Blackfriars via Mitcham Junction, Sutton and Wimbledon
2Xxx	NOT USED
2Yxx	Purley and Tattenham Corner (portion working with London Victoria – Caterham services) Stratford to Clapham Junction via Willesden Junction
2Zxx	NOT USED

TID	Class 9 services (WTT)
9Axx	East London Line to Crystal Palace – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF
9Bxx	East London Line from Crystal Palace – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF
9Cxx	East London Line to West Croydon – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF
9Dxx	East London Line from West Croydon – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF
9Exx	East London Line to New Cross St Albans City to St Pancras International (all stations services) – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF
9Fxx	East London Line from New Cross
9Gxx	East London Line to Clapham Junction Bedford to St Pancras International (semi-fast services) – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF
9Hxx	East London Line from Clapham Junction and Battersea Park Luton to St Pancras International (all stations services) – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF
9Ixx	East London Line to/from New Cross Gate
9Jxx	Peterborough and Horsham via London Bridge and Redhill
9Kxx	Luton / Kentish Town and Orpington via Catford
9Lxx	Bedford and East Grinstead via London Bridge – Suffixes 9L90 or greater in the northbound direction to be used for terminations at London Bridge Ctrl
9Mxx	<del>Services terminating at or starting from St Pancras platforms 1-4 to/from the Midland Main Line</del> Bedford and St Pancras International (all stations services) – NOT TO BE USED FOR SERVICES IN THE CORE OR SOUTH THEREOF East London Line services to Battersea Park
9Nxx	Bedford and Littlehampton via London Bridge and Hove - Suffixes must be 9N80 or greater

9Oxx	St Albans and Sutton via Mitcham Eastfields, Sutton and St Albans via Wimbledon
9Pxx	Luton and Rainham via London Bridge and Greenwich
9Qxx	NOT USED
9Rxx	Bedford and Gatwick Airport/Three Bridges / Brighton via London Bridge and Redhill
9Sxx	Cambridge and Gatwick Airport/Three Bridges/Brighton via London Bridge and Quarry Lines (Sunday services terminate at Gatwick Airport and runs via Redhill)
9Txx	Bedford and Gatwick Airport/Three Bridges / Brighton via London Bridge and Quarry Lines (Terminations at London Bridge (northbound) on Sunday mornings, or Gatwick Airport/Three Bridges (southbound) SX must be numbered 9T80 or greater
9Uxx	Cambridge and Maidstone East / Ashford via London Bridge and Swanley – Services which operate to and from Ashford must be numbered 9U80 or greater
9Vxx	St Albans and Sutton via Wimbledon, Sutton and St Albans via Mitcham Eastfields
9Wxx	Bedford and Gatwick Airport/Three Bridges / Brighton via Tulse Hill and Streatham Common – Services which not operate/terminate to the Midland Mainline or originate/terminate on the Brighton Main Line must be numbered 9W90 or greater
9Xxx	NOT USED
9Yxx	Welwyn Garden City / Blackfriars and Sevenoaks via Catford and Swanley
9Zxx	Not to be used in the WTT

### THIRD AND FOURTH CHARACTERS

Thameslink services †  
Northbound Services  
Southbound Services

EVEN NUMBERS\*  
ODD NUMBERS\*

\* Some services during the AM & PM peak will be given numbers between 80 and 99 to illustrate differences with the off-peak pattern. These may deviate from the numbering convention, by exception, with prior consultation between Network Rail and the Operator.

† This includes Thameslink operated services which start and terminate short of the Thameslink Core route.

#### Note:

The use of number range 80 to 99 should be used to illustrate trains which deviate from their normal pattern behaviour, be that calling pattern, unusually long dwells, or detachments / attachments in locations where this is not often undertaken.

### EMPTY COACHING STOCK MOVEMENTS

The train ID should reflect the last three characters of the next loaded service.

#### Exceptions:

London Victoria (Central) to / from Stewarts Lane Depot 5Tnn

Where nn is equal to the last two characters of the previously loaded service (departing) or next loaded service (arriving)

### 1.3.2 Days of Operation

The following abbreviations are used to identify the day or days that a train operates.

Abbreviation	Description
M	Monday
T	Tuesday
W	Wednesday
Th	Thursday
F	Friday
S	Saturday
Su	Sunday
EWD	Every Week Day (Monday to Saturday)
Daily	Every day – will not accept this; there must be a separate entry for Sundays
<b>Suffixes</b>	
O	Adding this indicates that the train will run only on that day or those days shown
X	Adding this indicates that the train will not run on that day or those days shown
<b>General</b>	
BHX	Denotes that this train does not run on a bank holiday

### 1.3.3 Traction and Rolling Stock

Abbreviation	Description
DMU	Any diesel multiple unit
ECS	Empty Coaching Stock
EMU	Electric multiple unit

### 1.3.4 Line Codes

Abbreviation	Description
8	No.8 Down
9	No.9 Reversible
10	No.10 Reversible
11	No.11 Reversible
AL	Atlantic Lines
BRV	Brighton Reversible
BRV	Bermondsey Reversible
CR	Carriage Road
DFL	Down Fast Line
DL	Down Line
DHL	Down St Helier
DKL	Down Kensington
DML	Down Main
DPL	Down Passenger Loop
DSL	Down South London Line
DV	Down Loop
DW	Down Wallington
DWL	Down West London
FL	Fast Line
GL	Goods Line
LRV	South London Reversible
QL	Quarry Line
REV	Reversible
RVF	Reversible Fast Line
RVL	Reversible Line
RVS	Reversible Slow Line
SL	Slow Line
SPR	Spur Line
SRV	Sussex Reversible
UBS	Up Bermondsey Spur
UKL	Up Kensington
UL	Up Line
ULS	Up South London
UML	Up Main
UPL	Up Platform Loop
UPV	Up Passenger Loop
UHL	Up St Helier
USL	Up Slow Line
UV	Up Loop
UW	Up Wallington
UWL	Up West London
UXL	Up Sussex Loop
WCR	West Carriage Road

### 1.3.5 Activity and Other Codes

Abbreviation	Description
*	Suppression of traffic stop indicator
-D	Train stops to detach vehicles
-T	Train stops to attach and detach vehicles
-U	Train stops to attach vehicles
A	Train stops or shunts for other trains ahead or to pass only. Shows as an * in WTT
AE	Trains stops to attach/detach assisting locomotive.
BL	Train stops to attach or detach a banking locomotive
C	Train stops to change train crew
D	Train only stops to set down passengers. Shows as an s in NRT
E	Train stops for examination
G	NRT data to add
H	Notional Activity to prevent WTT column merge
HH	As H, where there is a third column involved
K	Passenger count point
KC	Ticket collection and examination point
KE	Ticket examination point
KF	Ticket examination point – 1 <sup>st</sup> Class only
KS	Selective ticket examination point
L	Train stops to change locomotives
N	Stop not advertised to the public
OP	Train stops for other operating reasons
OR	Train locomotive on rear of train
PR	Train propelling between points shown
R	Train stops when required. Shows as an x in NRT
RETB	Radio Electronic Token Block
RM	Trains stops for a reversing movement or driver to change ends
RR	Train stops to allow the locomotive to run-round its train
S	Trains for railway personnel only
T	Trains stops to pick up or set down passengers
TB	Train begins (Origin)
TF	Train finishes (Destination)
TS	Detail consist for TOPS Direct requested by DB Cargo
TW	Train stops to pick up or set down a staff, tablet or token on Single Lines. See Section 5.2
U	Train only stops to pick up passengers. Shows as a u in NRT
W	Train stops for watering of coaches
X	Train passes another train at crossing point on single line. See Section 5.2
x{	Suppress running line information
{	Force running line indication
{ }	Force path and line indications
}	Force path indication
#	Force stop with TW

#### Activity Codes - Notes

1. Any passenger train that stops at a location automatically generates a T Activity unless it is suppressed.
2. If an Activity is required that removes the 'passenger stop' Activity (T, D, U and R), then the 'passenger stop' Activity must always appear in the first Activity field (e.g. T -D would be correct, -D T would not). This is because the National Rail Timetable (NRT) extract program only considers the first Activity field. If it does not find a 'passenger stop' Activity in the first field the time will not be extracted to appear in the NRT.
3. Up to 6 Activities may be shown for each event.
4. No two Activities may be duplicated at the same event.
5. At any one event, the following groups are mutually exclusive
  - a) D, U, T, N, S, TW, OP.
  - b) -D, -U, -T.
  - c) TB, TF.
  - d) KC, KE.
6. N, R, G, D and U are only valid with Train Categories XC, XD, XI, XX, XZ, OO, OW, OL, BS, BR and blank (i.e. 'advertised' services).
7. K, KC, KE, KF, KS are only valid with Train Categories starting X or O.
8. If TF is present then none of K, KC, KE, KF, KS can be present.
9. Activity T indicates that a train stops to pick up and set down. This normally refers to passengers. Activity -T indicates that the train stops to attach and detach vehicles. At any location where a 'stop' time is shown, ITPS or a similar system will assume a default Activity is required unless otherwise specified. These default Activities are as follows: T for trains with a Train Category starting in X or O, OP for trains with a Train Category starting in Z or E, and -T for all other trains (but see below). The default Activity will be generated when the upload file is created.
10. If Activities U, D, N, R, OP, S, TW, -U or -D are specified then this overrides the defaults and only the specified Activities will be included in the upload file (it is not necessary to use the \* suppression code if these codes are present).
11. If a traffic Activity is NOT required at a 'stop' location with Activities other than U, D, N, R, OP, S, TW, -U or -D (e.g. at 'C' or 'L' stops) then the \* must be input to the ITPS or similar system train specification at that location to suppress -T or T. If the \* is not added to indicate a non-traffic stop then T, -T or OP will be added to the upload file.
12. If an Activity -T (only) is required on a train with a Category starting in X or O it is necessary to add a \* to the spec (to suppress 'T') and positively show -T in the Activity column.

#### Train Service Codes

##### East London Line Train Service Codes

Section	Service Code
Highbury and Islington to Dalston Junction	22215003
Dalston Junction to New Cross	22218000
Dalston Junction to New Cross Gate	22218000
Dalston Junction to Queens Road Peckham	22218000
New Cross Gate to Crystal Palace/West Croydon	22215003
Queens Road Peckham to Clapham Junction	22214000

## 2 Route Description

### 2.1 Planning Geography

Network Rail maintains the planning geography and issues it to Train Operators using the BPlan system. BPlan data is to be regarded as the master geography and it is the responsibility of Train Operators and nominated Network Rail users to ensure that data in their train planning systems reflects the master geography.

It is essential that all locations, times and full details such as platforms, running lines, activities, etc. comply fully with all of the following rules. Any Network Links used for buses only are to have running line defined as BUS. All data used by a specifier must be that supplied by Network Rail: use of estimated times added or amended locally will cause the trains concerned to fail validation.

In order to avoid the creation of unnecessary journey legs and associated point-to-point timings, all passing times must conform to these rules.

Locations in bold type are mandatory timing points.

Locations in normal type are non-mandatory timing points.

Locations in italic type are not timing points but are shown for reference purposes.

**Locations where shunters are required are referred to within the Notes for planning purposes only**

Line references shown in brackets e.g. (SO500) are only for reference purposes.

In the tables below, the following codes apply:

F	Only freight trains are timed here
P	Only passenger trains are timed here
S	Only stopping trains are timed here
X	Only trains crossing from one running line to another are timed here

## SO250 FACTORY JUNCTION TO MITRE BRIDGE JUNCTION

TIMING POINT	DOWN	UP	CODE	NOTES
<b>Factory Junction</b>	-	-		To/from Voltaire Road Junction – Refer to Kent Timetable Planning Rules - SO110 and SO645 To/from Stewarts Lane Junction - SO250A

## 2.2 Route Opening Hours

Subject to constraints imposed by the Engineering Access Statement, all routes are open continuously, except as shown below. The hours shown reflect the contractual opening hours. The actual opening hours may vary from those shown. For a complete listing of current signal box opening hours please refer to the “Compendium of Signal Box Opening Times” which can be found on the Network Rail website:

<http://www.networkrail.co.uk/aspx/3741.aspx>

If there is doubt about a signal box's opening hours check with the appropriate Network Rail Operations Manager.

When the routes shown are required for services diverted under the Engineering Access Statement, opening hours will be increased as necessary on a temporary basis.

Signal boxes equipped to be switched-out during a route's opening hours are shown within the routes concerned.

## 3 Electrification

### 3.1 Electrification Limits

Limits of the 25 kV AC and 750V DC electrification systems are contained in Table A of the Sectional Appendix to the Working Timetables, issued by, Network Rail. Refer to Table A for the given location to identify the type of electrification that applies.

### 3.2 Electrification Supply Restrictions

Under normal conditions, the electrification power supplies will not place any restrictions on the use of approved electric traction. However, the Route Clearance sections of the Sectional Appendix to the Working Timetables, issued by, Network Rail do tabulate restrictions on the movement of electric trains. Refer to Table 'A' and select Route Clearance.

Under maintenance conditions, certain sections of the electrified network may be blocked to electric traction. These restrictions are contained within the Network Rail Engineering Access Statement for the appropriate year. Additional restrictions may also arise in connection with engineering possessions requested through the Engineering Access Statement amendment procedure.

## 4 Rolling Stock Restrictions

### 4.1 Locomotive Route Availability

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables issued by Network Rail. Refer to Table 'A' and select Route Clearance.

#### SO500 LONDON VICTORIA TO BRIGHTON

ROUTE SECTION	DOWN	UP	RESTRICTION
London Victoria to Brighton	ALL Linecodes	ALL Linecodes	Class 92 Locomotives are not permitted on the whole of the route

#### SO550 REDHILL TO TONBRIDGE

ROUTE SECTION	DOWN	UP	RESTRICTION
Redhill to Tonbridge	ALL Linecodes	ALL Linecodes	Class 92 Locomotives are not permitted on the whole of the route

### 4.2 Passenger Stock Restrictions

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables issued by Network Rail. Refer to Table 'A' and select Route Clearance.

#### SO170 TONBRIDGE TO BOPEEP JUNCTION

#### SO600 WILLINGDON JUNCTION TO ASHFORD INTERNATIONAL

##### Restrictions due to Electrical Control Office Outages

Unplanned outage of High Brooms Substation traction supply rectifier or all dc circuit breakers open, (Grove Hill traction supply rectifier in service). All 12 car electric trains to operate in half power mode/notch 2, between buffer stops of 12 car Tonbridge Wells Turn back siding and High Brooms station in both directions. No additional restrictions on 8 or 4 car formations.

Unplanned outage Grove Hill Substation traction supply rectifier and/or HV Feeder 1921 or all dc circuit breakers open (High Brooms and Wadhurst traction supply rectifier in service). All trains to operate in half power mode/notch 2, between Frant station and High Brooms station in both directions

Unplanned outage Wadhurst Substation traction supply rectifier and/or HV Feeder 1922, (High Brooms and Grove Hill traction supply rectifier in service)

All 12 car electric trains to operate in half power mode/notch 2, between Tonbridge Wells station and High Brooms station in both directions. No additional restrictions on 8 or 4 car formations

Extended high voltage feeding from feeder 1926 at Bo Peep substation to Grove Hill substation and failure of UPS at Grove Hill or Wadhurst substations. All electric trains to operate in half power mode, notch 2, between Frant station and High Brooms station in both directions

Outage of High Brooms substation traction supply rectifier or all dc circuit breakers open and outage Grove Hill substation traction supply rectifier and/or HV Feeder 1921 or all dc circuit breakers open (Wadhurst traction supply rectifier in service). Electric train services limited to maximum of 8 car operation between Tonbridge station and Hastings station, with a limitation of at least a 30 minute gap between services on the same road at each station. In addition, ALL electric trains to operate in half power mode/notch 2, between Tonbridge station and Stonegate station in both directions

Unplanned outage of High Brooms substation traction supply rectifier or all dc circuit breakers open and unplanned outage Wadhurst substation traction supply rectifier and/or HV Feeder 1922 or all dc circuit breakers

## **SO170 TONBRIDGE TO BOPEEP JUNCTION**

## **SO600 WILLINGDON JUNCTION TO ASHFORD INTERNATIONAL**

open, (Grove Hill substation traction supply rectifier in service). Electric services limited to maximum of 8 car operation between Tonbridge station and Hastings station, with a limitation of at least a 30 minute gap between services on the same road at each station.

In addition, ALL electric trains to operate in half power mode/notch 2, between Tonbridge station and Etchingham station in both directions.

Planned outage of the traction supply rectifier (or all dc circuit breakers open) at High Brooms and/or Grove Hill and/or Wadhurst substations are not permitted Monday to Saturday between the hours of 06.00 hours and 21.00 hours. Planned outage of Feeder 1921 or Feeder 1922 is not permitted Monday to Saturday between the hours of 06.00 hours and 21.00 hours unless prior arrangements have been made to enable the rectifiers at the affected substation to remain in service.

## **4.3 Freight Wagon Restrictions**

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables, issued by Network Rail. The Route Availability for a given location is in the 'Signalling and Remarks' column of Table A. Route Clearance Table D5 Route clearance of freight vehicles gives further guidance on freight wagon restrictions.

Trains conveying vehicles that have a heavy axle weight or other exceptional characteristics, or vehicles conveying containers or swap bodies require an RT3973 form.

*Note: The Rule Book GERT8000 Section TW4 defines a container as an intermodal transport unit constructed to a standard (usually specified by the ISO) suitable for conveyance by road, rail or sea.*

*Note: The Sectional Appendix does not cover the CTRL HS1. The CTRL has its own Working Manual.*

## **4.4 Freight Train Load Limits**

Trailing load limits for all traction types are contained in the Freight Loads Book published by Network Rail.

*Note: It is important to understand the weight limitations that apply to trains especially over sections of heavily graded routes. Coupling strength information is also contained in the Freight Loads Book. Coupling strength is important in determining the trailing loads that trains can convey.*

## **4.5 Freight Train Length Limits**

Refer to the Freight Train Loads Book published by Network Rail for the length limits of freight trains.

*Note: The Sectional Appendix quotes loop lengths in metres and feet. These are the absolute lengths of the loop from the signal at the outlet to the fouling point at the entrance to the loop.*

## 4.6 Driver Only Operation Limits

When special trains are required to operate DOO (NP) over the below routes, it must be ascertained that competent staff are available to deal with these trains at the forwarding and receiving terminals, sidings, yards etc. or where locomotive changes take place en route. Furthermore, signal boxes are to be advised of these additional DOO (NP) services, with particular reference to ECS trains.

### Notes:

- Pass - Passenger trains
- ECS Slide - Empty Coaching Stock with power operated sliding doors
- NA - Not authorised (except where # shown).
- P - Permitted.
- + - Subject to any relevant Route Availability restrictions.
- \* - Subject to provisions of working manual - White Pages (Sect H) paragraph. H10/1.
- @ - Unless the cab from which the train is being driven is Speed Sensing Fitted (SSF), slam door MU trains are limited to a maximum journey of 10 miles.
- # - Permitted for short notice movements, when all other DOO (NP) conditions are fulfilled and all doors are locked before departure. Authorisation MUST be obtained from Network Rail Operations Control, before this can be applied.

## 4.7 Engineers' Trains Restrictions

Some On Track Machines (OTMs) do not reliably activate track circuits. These OTMs must use one of the following special reporting numbers 6Z09, 7Z09 or 8Z09\*. Because these OTMs do not reliably activate track circuits it is not possible to apply the headways and junction margins as outlined in Timetable Planning Rules consistently and it is therefore not possible for Operational Planning to provide timings for these movements.

\* Source GE/RT 8000-OTM

## 5 Running Times, Margins and Allowances

Except where otherwise stated; the information in this section of the Timetable Planning Rules reflects the general rules used in developing the 1994/5 timetable. (Several exceptions to the general rules were agreed for 1994/5 and exceptions may continue to be possible with the specific agreement by Network Rail in every case.

### 5.1 Sectional Running Times

The definition for Sectional Running Times (SRTs) is listed in Section 6.4 of the National TPRs.

#### 5.1.1 Source of Current SRTs

The definitive catalogue of SRTs is BPlan.

#### 5.1.2 Method of Calculation

SRTs are revised by Train Operators and Network Rail as part of the Revision of Timetable Planning Rules process outlined in Network Code Part D 2.2. Normally they will not change from one timetable to the next. Network Rail will, however, re-calculate SRTs for particular train/route combinations in the following circumstances:

- i) Where a Train Operator anticipates using a train/route combination for which no suitable SRTs exist;
- ii) Where Network Rail anticipates a change to route data, e.g. line speed changes;
- iii) Where there is evidence that the SRTs in current use do not adequately represent real train performance;
- iv) Where it is cost-effective to re-calculate all SRTs on a route at the same time as a re-calculation for a particular train type.

Network Rail will reflect the methodology and assumptions described in Section 6 of the National TPRs when calculating TPR proposals, unless and to the extent documented otherwise in respect of any given proposal. Timetable participants are encouraged to submit change proposals for review and consultation in line with the national methodology, or in line with such alternative methodology and assumptions as favoured by the proposer. NR will not seek to reject any proposal on the exclusive basis of the methodology employed, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

SRT change proposals may be calculated in a number of ways including, but not limited to:

Through actual timing of trains

- a) Use of On Train Monitoring Recorder (OTMR) systems
- b) Use of computer system actual values
- c) Use of computer simulation tools
- d) By any other agreed methodology

It is permissible to include percentage uplift in SRTs instead of applying engineering recovery allowances to be agreed by all affected parties.

In the event that the application of different methodologies produces conflicting proposals, a joint observation exercise should be undertaken to ascertain what happens in reality.

When the final SRTs obtained by the above methodology are different from those currently in use, Network Rail presents them to Train Operators for comment either in Section 5.1.3 below or through the Timetable Planning Rules Change Procedure.

### 5.1.3 New and Revised Sectional Running Times

New and revised SRTs are revised by Train Operators and Network Rail on an individual basis. These should be supplied by applying the methodology described in Section 6 of the National TPRs unless another methodology is deemed appropriate, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

### 5.1.4 Timing of Trains Consisting of Passenger Vehicles on Goods Lines

The sectional running timings quoted for trains consisting of passenger vehicles on Goods Lines reflect the speeds shown in the relevant Table 'A' of the appropriate Sectional Appendix. They do not constitute an authority to time trains conveying passengers on a Goods Lines. Nor do they reflect the permitted speeds at which a train conveying passengers can proceed. Network Rail will offer the sectional running times for trains conveying passengers on a Goods Line on a train-by-train basis. For those times please apply to the Operational Planning Department.

Operations Publications publish the authority to allow the planned operation of trains conveying passengers on Goods Lines. Before Operations Publications can grant authority they require confirmation that the track is fit for purpose and that there is a safe method of operation. Therefore, the Operational Planning Department must apply to the relevant Track Engineer and Operations Manager for confirmation of these requirements in writing. The Operational Planning Department must pass these responses to Operations Publications. The Operational Planning Department is responsible for advising Operations Publications of the requirement to operate a passenger train on a Goods Line at least 8 weeks before the day of operation.

## 5.2 Headways

The definition for Headways is listed in Section 6.5 of the National TPRs.

**Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.**

### 5.2.1 Headway Values

All times are in minutes. All routes are shown.

Where track circuit block (TCB) signalling applies, the standard headways for each route are shown, together with any exceptions.

AB indicates locations where absolute block signalling applies: here the headway is to be calculated from the transit time of the first of each pair of trains running between the consecutive block posts being considered. To this transit time shall be added 2 minutes to allow for the signaller's actions. Exceptions are shown as AB and appear together with the actual headway value to be used, which includes the allowance for signallers' actions. Where there is an intermediate block signal, the absolute block section concerned shall be between this signal and the next block post in advance.

Single lines and other forms of signalling are shown, together with any values applicable, where they occur.

"OTNS" or "OT" indicates One Train Working with No Train Staff; "OTS" or "OT(S)" indicates One Train Working with Train Staff. "NST" indicates No Signaller token. In these cases only one train is allowed in the section at one time; a second train cannot be allowed to enter the section until the first train has left the section.

"ETB" indicates Electric Token Block and "TB" indicates Tokenless Block for single lines.

"RB" indicates Radio Signalling where "long section tokens" can be issued between certain block posts during times of low traffic volume.

Where headways are shown as being "fast" or "slow" these descriptions refer to the service that the path is following i.e. Fast is a non stopping service and Slow is a stopping service. **The headway value does not refer to running lines.** The "slow" headway should be applied to a service following a preceding service which stops at either a station or any other location for operational reasons. The "fast" headway should be applied to a service following a preceding service which does not stop at that location. Immediately the preceding service stops at any location for any reason, the following service headway should be amended to the "slow" value. If in doubt, apply the use of the "slow" headway.

Canal Junction to Rolt Street Junction	2½	2½	
Rolt Street Junction to New Cross	SINGLE LINE		One Train Working Only

### EA1327 SURREY QUAYS SILWOOD JUNCTION TO OLD KENT ROAD JUNCTION

TIMING POINT	DOWN	UP	NOTES
Surrey Quays (Silwood Junction) to Old Kent Road Junction	3	3	

## 5.2.2 General Capacity Constraints

The standard headway as shown in 5.2.1 is defined as the minimum planned interval between trains at their closest point in any route section as shown. Assumptions as to the capacity of any particular route section should not be made solely by the information contained within this sub-section.

Network Rail will expect operators to allow greater margins between trains, where possible, in order that the finished timetable is robust.

If operators time a series of trains at the minimum headway as shown, they are expected to allow an additional margin of either 2 minutes before another train is timed to follow, or 1 minute each for the next 2 successive trains. A series should normally be defined as a maximum of 4 successive trains.

If trains are deliberately timed to close up on a preceding train, additional allowances must be inserted.

ETCS Level 2 operating within GTR trains should normally be timetabled to operate between Blue Anchor Junction and London Blackfriars via the Snow Hill Lines and lines 4 & 5. Special operational arrangements will need to apply for trains taking alternative routes between these locations. At train service frequency of 22tph and above, ETCS and ATO shall be the prevailing operational mode. 2.5 minute headways should not be applied for consecutive moves not operating in ETCS L2 when there is a timetabled service at frequencies of 22tph and above.

In the interests of a more robust timetable and performance, it is intended that bids from operators for additional services over certain lines and junctions which have minimal spare capacity will be limited for both permanent and amended train working, with the following exceptions:

- a) Where usage already exceeds the capacity limit, operators will be permitted to retain existing paths but will be encouraged to move trains away from the critical period or route section where there are acceptable customer/cost considerations. If an operator relinquishes a path in the critical period, other operators would not be able to re-occupy the path.
- b) If an operator wishes to bid for an additional train/s in the critical period or over the critical route section, that request will be tabled for discussion. Normally, additional bids that breach the capacity limit will not be accepted but in exceptional circumstances may be accepted subject to all parties affected acknowledging and accepting the performance risks.

In 2007 Network Rail declared the route between Reading and Gatwick Airport as congested, solely on account of the constraints on platform working at

Reading  
Redhill  
Gatwick Airport

For further details please refer to 'The Network Statement' as available on the following website:  
[www.networkrail.co.uk](http://www.networkrail.co.uk)

Where single line working is to operate or trains are to be routed to run on a line other than that normally planned for them, constraints on capacity will apply – see Engineering Access Statement.

The following special capacity and timing restrictions apply in addition to the constraints stated elsewhere in this document:

### SO250 FACTORY JUNCTION TO MITRE BRIDGE JUNCTION

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Factory Junction	Factory Junction	07.00 – 09.45 16.00 – 19.00	From Longhedge Junction to Atlantic/Chatham Lines
North Pole Junction	North Pole Junction to Latchmere Junction (No 3)	ALL DAY	No more than 13 paths per hour in each direction Stopping services are likely to absorb more than one path

### SO250A GROSVENOR BRIDGE JUNCTION TO FACTORY JUNCTION

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Factory Junction	Factory Junction	07.00 – 09.45 16.00 – 19.00	From Longhedge Junction to Atlantic/Chatham Lines

### SO250D FALCON JUNCTION TO LATCHMERE JUNCTION (NO 1)

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Clapham Junction	Factory Junction	07.00 – 10.00 16.00 – 19.00	To and from Platforms 16 and 17 and Brighton Slow Lines

### SO500 LONDON VICTORIA TO BRIGHTON

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Clapham Junction	Falcon Junction	07.00 – 10.00 16.00 – 19.00	To and From Platforms 16 and 17 and Brighton Slow Lines

#### ROUTE SECTIONS

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
London Victoria / Three Bridges	It is intended to restrict usage to 90% of capacity	06.00 – 21.00 EWD	In peak periods no more than 20 trains per hour will be permitted on the fast Lines
London Victoria and Balcombe Tunnel Junction	The capacity is restricted to two track railway	SUNDAYS: No more than the current level of service	Two Track railway timetables on Sundays are detailed in the Engineering Access Statement and also in section 6.3 Two-Track Timetable Railway of the Timetable Planning Rules.

### SO510 LONDON BRIDGE TO EPSOM DOWNS

#### ROUTE SECTIONS

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Bricklayers Arms Junction and Anerley	No more than 8 trains per hour to be timed on the Slow Lines	SUN Start of service to 12.00	Timetable must include a minimum of four 10 minute gaps per hour between trains for patrolling to take place through Slow Line Platforms

---

**SO645 BATTERSEA PARK TO PECKHAM RYE (ATLANTIC LINES)**

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Factory Junction	Factory Junction	07.00 – 09.45 16.00 – 19.00	From Longhedge Junction to Atlantic/Chatham Lines

## 5.3 Junction Margins and Station Planning Rules

The definition for Junction Margins and Station Planning Rules is listed in Section 6.6, 6.7 and 6.8 of the National TPRs.

### Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.

All times shown are in minutes. Where adjustments to sectional running times are shown, the value must be added to the normal SRTs shown in B Plan. Negative adjustments are specially identified.

Minimum station allowances are the minimum practical for the particular type of stock. These are shown with exceptions being listed by line of route where applicable.

Peak is defined as services arriving in London (Blackfriars, Victoria or London Bridge) between 07.00 and 09.59 SX and departing London (Blackfriars, Victoria and London Bridge) between 16.00 and 18.59 SX.

STANDARD VALUES – MINIMUM		
Adjustments to Sectional Running Times		
Movements	Reason	Value
Terminating trains arriving on half minutes in final timing link (with the exception of ARL)	Station working	{1/2}
All allowances mentioned in the exceptions should be included in train times when approaching the listed timing point unless otherwise noted.		
Attachment of Units		
Standard	4*	
* At least 1/2 minute must be added to the schedule of rear portion when approaching the front portion to attach.		
Attachment of Units – Great Western Only		
Class	Allowance	Comments
769	5*	If ECS trains coupling together
*7 if a loaded passenger train		
Attachment of Units – Southern Services Only		
Class	Allowance	Comments
171	3	2 applies for ECS
313	3	2 applies for ECS
377 or 387	4	
442	4	
455	3	2 applies for ECS
Attachment of Units – South West Railway Services Only		
Class	Allowance	Comments
450	4	
458	5	
707	4	
Berthing Facilities		
When berthed on a running line during darkness or other conditions of poor visibility the person in charge must place a lamp displaying a red aspect at the end(s) of the train to face any movement that may approach on the same line.		
Trains must not be berthed on running lines except:-		
a) on platform lines at terminal stations		
b) on dead end bay lines at through stations		
c) on lines specified at individual locations within Section 5.3		

STANDARD VALUES – MINIMUM		
Connectional Allowance	5 minutes	
Detachment of Units:		
Standard	3*	
*unless a Class 769 (GWR) which is 5 minutes		
Detachment of Units – Southern Services Only		
Class	Allowance	Comments
171	3	2 applies for ECS
313	3	2 for ECS
377 or 387	4	
442	4	
455	3	2 for ECS
Detachment of Units – South West Railway Services Only		
Class	Allowance	Comments
450	4	
458	5	
707	4	
Dwell Time*		
* Dwell times may be varied during the production of timings for trains in conjunction with engineering work or other special traffic arrangements at the discretion of the Operational Planning Project Manager.		
Standard	½*	
*All GWR Class 769 services will have a 1 minute dwell time		
Trains terminating and then running ECS in the same direction	1	
Trains terminating and then running ECS for Thameslink services	2	
Generic Rolling Stock Classes		
Train Class	ITPS Timing Load and TPR Values	
Class 171	Class 170*	
Class 375 and 377	Class 375*	
*170 and 375 are generic timing loads but all TPR Values for Southern are based on 171 or 377 as appropriate.		
Locomotive Change	10	
Locomotive Run–Round	10	
Junction Margins		
Movement	Margin	
Between all conflicting movements except as below	2	
Between all conflicting movements following a class 4, 6, 7 or non-seasonal class 8	3	
Resetting of route for a departing service following the arrival of a conflicting inwards service	1	
Reoccupation of platforms when a change of direction or a conflicting move is involved	3	

STANDARD VALUES – MINIMUM								
Minimum Turnround – Passenger Stock								
Stock	1 or 2 Car	3 or 4 Car	5 or 6 Car	8 Car	7 or 9 Car	9 or 10 Car	10 or 12 Car	12 Car
Class 158 DMU	3 Mins	4 Mins						
Class 159 DMU		4 Mins	5 Mins			6 Mins		
Class 165/166 DMU	3 Mins	3 Mins	4^ Mins	5 Mins				
Class 171 DMU	3 Mins	4 Mins	4 Mins	5 Mins		6 Mins		
Class 313 EMU		4 Mins	5 Mins					
Class 377 EMU (Southern Services)		4 Mins	4 Mins	5 Mins	5 Mins		6 Mins	
Class 378 EMU			6 Mins #					
Class 387 EMU (Southern Services)		4 Mins		5 Mins				6 Mins
Class 442 EMU			7 mins			9 mins		
Class 450 EMU		5 Mins		6 Mins				7 Mins
Class 455 EMU (Southern Services)		5 Mins		6 Mins				
Class 455 EMU (South Western Railway Services)		6 Mins		7 Mins			8 Mins	8 Mins
Class 458 EMU			6 Mins			7 Mins		
Class 700 EMU				8 Mins				10 Mins
Class 701 EMU								
Class 707 EMU			6 Mins			7 Mins		
Class 769		4 Mins		5 Mins				
^ 3 Minutes applies to 5 cars								
# - The following exceptions apply: Passenger to ECS 5 minutes, ECS to ECS 5 minutes								
Minimum Allowance for Class 4, 6, 7 or non-seasonal Class 8 movements								
Between stopping and then propelling				2				
Crew change				2				
Light engine reverse				2				
Runaround in stations				20				
Runaround in yards or depots				20				
Permissive Working								
Where attaching/detaching and platform sharing is permitted, only class 1, 2, 5 and 0 trains are allowed to undertake permissive working. See Rule Book								
Station Allowances								
These minimum allowances may be increased by negotiation for specific traffic needs. Any subsequent reduction in these allowances must be agreed by Network Rail Southern Region.								

THE FOLLOWING INFORMATION SHOWS THE EXCEPTIONS TO THESE STANDARD VALUES

## SO250 FACTORY JUNCTION TO MITRE BRIDGE JUNCTION

### Longhedge Junction

#### Limit of Shunt

	Length Limit
Down Ludgate (Clear of signal VS63)	

#### Longhedge Junction Signal W135 Freight Restriction

Between Longhedge Junction and Clapham Junction is steeply graded. Therefore a down direction locomotive hauled train from Longhedge Junction via the Ludgate Line must not be allowed to pass signal W135 (Culvert Road) until the route can be set from signal W145 into Clapham Junction

### Kensington Olympia

#### Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below:-

Platform 2	Attaching/Detaching and Platform Sharing permissible for Class 377 and Class 378 only, maximum of 10-cars. This applies in both directions.
------------	---

#### Simultaneous Moves Not Permitted

First Movement	Second Movement	Margin
Train departs Shepherds Bush on the Down West London in the direction of Mitre Bridge Junction	Train departs or passes Kensington Olympia on the Down West London in the direction of Shepherds Bush	1
Train departs/passes Shepherds Bush Platform 1 on the Up West London and arrives into Kensington Olympia platform 3	Train departs Kensington Olympia Platform 2 on the Down West London crossing to the Up West London into Platform 1 at Shepherds Bush	1
Train arrives at Kensington Olympia Platform 2 from Shepherds Bush	Train approaching VC801 on the Down West London at Kensington Olympia going north	2
Train arrives at Kensington Olympia Platform 2 from West Brompton	Train approaching VC698 on the Down West London at Kensington Olympia going south	2

#### Train Length Restriction

A standing train on the Down West London (through line) must not exceed 1236ft / 58 SLU in length. This is to avoid fouling the track circuits preventing a route being set via the Platform Loop (Platform 2)

### Shepherds Bush

#### Minimum Turnround – Passenger Stock

	Margin
Platform 2 Down	6*

\* Applies to trains terminating from the Kensington Olympia direction and starting back towards Kensington Olympia in Platform 2 only. The time includes an allowance for shunting the train to enable the driver to observe signal VC806. Train not to exceed 4 cars.

#### Simultaneous Moves Not Permitted

Shepherds Bush		
First Movement	Second Movement	Margin
Train departs or passes Kensington Olympia towards West Brompton	Train departs Shepherds Bush towards Kensington Olympia	1
<b>Dwell Times</b>		
ARL Services only		1

North Pole Signal VC813		
<b>Dwell Times</b>		
All Down Trains formed of EMU Stock (except Class 378)*	1	Required for changeover from DC to AC
* Trains formed of Class 378 EMU stock operated by London Overground are not required to stop at this location as the traction changeover can be completed whilst on the move		

North Pole Signal VC818		
<b>Dwell Times</b>		
All Up Trains formed of EMU Stock (except Class 378)*	1	Changeover from DC to AC
* Trains formed of Class 378 EMU stock operated by London Overground are not required to stop at this location as the traction changeover can be completed whilst on the move		
<b>Planning Note</b>		
When a down train has terminated in either platform 1 or platform 2 at Shepherds Bush in order to reverse, a following train cannot depart or pass North Pole Jn on the Up West London Line until 1 minute after the preceding service has departed for Kensington Olympia		

North Pole Turnback Siding		
<b>Junction Margins</b>		
First Movement	Second Movement	Margin
Between all conflicting movements to/from Turnback siding		2
<b>Train Length Restriction</b>		
Length of Turnback Siding 162 metres to accommodate 1 x 5 car Class 378, 2 x 4 car Class 377, 1 x 5 car Class 710, 2 x 4 car Class 710		

SO250A - Stewarts Lane T&R.S.M.D		
<b>Berthing Facilities</b>		
	Cars	Notes
Shed No 1	10	Carriage washing facilities
Shed No 2	10	Carriage washing facilities
Shed No 3	12	Carriage washing facilities
Shed No 4	12	Carriage washing facilities
Shed No 5	12	Carriage washing facilities
Shed No 6	12	VSOE only / Carriage washing facilities
Shed No 7	12	VSOE only / Carriage washing facilities
Shed No 8		Out of Use
Shed No 9	12	Carriage washing facilities
Shed No 10	12	Maintenance Only / Carriage washing facilities

## SO250A - Stewarts Lane T&R.S.M.D

Shed No 11	12	Maintenance Only / Carriage washing facilities
Shed No 12	12	Maintenance Only / Carriage washing facilities
Shed No 13	12	Maintenance Only / Carriage washing facilities
Shed No 14	12	Maintenance Only / Carriage washing facilities
Siding No 1	10	Carriage washing facilities
Siding No 2	12	Carriage washing facilities

### Planning Note

When a train departing Stewarts Lane T&R.S.M.D bound for London Victoria (Central) follows another train on the Battersea Reversible towards Battersea Pier Junction, it cannot pass or arrive at Stewarts Lane Junction until 3½ minutes after the preceding train has passed Battersea Pier Junction due to only 1 signal (Signal VC546) in the section. This restriction also applies if the second train is reversing at Stewarts Lane Junction Signal 571 which is the only available signal when formed of rolling stock that does not permit the driver to walk through the train, such as an 8-car Class 455.

**Futhermore, a train cannot be released from London Victoria if it is scheduled over the Battersea Reversible while another train is reversing at Stewarts Lane Junction.**

## SO250B BATTERSEA PIER JUNCTION TO LONGHEDGE JUNCTION

### Battersea Loop

#### Planning Restriction

Battersea Loop is leased by DB Cargo and therefore any non-DB Cargo services planned to use it must be pre-authorised by DB Cargo themselves. – See SO250A Planning Note relating to moves on/off the loop

## SO250D FALCON JUNCTION TO LATCHMERE JUNCTION (NO 1)

### Clapham Junction

See entry under route – SO500

## SO500 LONDON VICTORIA TO BRIGHTON

### London Victoria (Central)

For London Victoria (Eastern) Refer to Kent Timetable Planning Rules - SO110

**For train planning purposes the station is divided into two parts.**

**Platforms 1-8 are known as Victoria (Eastern).**

**Platforms 9-19 are known as Victoria (Central).**

#### Adjustment to Sectional Running Times

Movement	Reason	Value
Approaching an already occupied platform	Calling on allowance	{½}

#### Berthing Facilities

Platform 18	12*	
Platform 19	12*	

\* Maximum to be berthed in Platforms 9-19 = ~~52~~ 60 cars

**Connectional Allowance** 15\*

\* Connectional allowance of 10 minutes applies to Southeastern and Southern

### ECS Moves

ECS Moves to Selhurst T&R.S.M.D after the morning peak are to be routed via Streatham Common

### Front Train Working:

In the event of Front Train Working with 2 (or more) loaded services a minimum of 5 minutes should be allowed between departure of Front Train and Rear Train to allow indicators etc to be changed.  
Passenger trains that divide en route should not be "front trained".

**Headway** 2½ \*

\* Following consecutive departures from Platforms 13-19 to the Down Brighton Slow

### Junction Margins

First Movement	Second Movement	Margin
All conflicting moves Victoria Central (Platforms 9-19) except as below		3
Depart Platforms 12-15 to either the Brighton Reversible or the Up Carriage Sidings	Any conflicting inwards service	5
Depart Platform 14 or 15 to the Down Slow	Any conflicting arrival from the Up Slow	4*
*Due to overlap issue on signal VC532. Second train has to wait at signal VC538 whilst first train crosses to the Down Slow via 240 crossover		
Any conflicting train completing a reversing move at Stewarts Lane Junction	Depart London Victoria towards the Battersea Reversible or Stewarts Lane Junction	2
Resetting of route for a departing service following the arrival of a conflicting inwards service		1

### Passenger Stock Turnround Allowances

	Margin
Main Line Services (Loaded to Loaded)	12
Suburban Services (Loaded to Loaded)	7

### Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below:-

Platform 9	Attaching/Detaching and Platform Sharing
Platform 10	Attaching/Detaching and Platform Sharing
Platform 11	Attaching/Detaching and Platform Sharing
Platform 12	Attaching/Detaching and Platform Sharing
Platform 13	Attaching/Detaching and Platform Sharing
Platform 14	Attaching/Detaching and Platform Sharing

## SO500 LONDON VICTORIA TO BRIGHTON

### London Victoria (Central)

For London Victoria (Eastern) Refer to Kent Timetable Planning Rules - SO110

Platform 15	Attaching/Detaching and Platform Sharing
Platform 16	Attaching/Detaching and Platform Sharing
Platform 17	Attaching/Detaching and Platform Sharing
Platform 18	Attaching/Detaching and Platform Sharing
Platform 19	Attaching/Detaching and Platform Sharing

### Platform Re-Occupation Margin

Platforms 9 to 12 and 15 to 19	4*
Platforms 13 and 14 to/from the Fast Line	3
Platforms 13 and 14 to/from the Slow Line	4*

\* A 3 minute reoccupation margin can be applied except in the following circumstances:

1. consecutive movements, or
2. where a platform is already occupied under permissive working arrangements.

### Station Working Requirements:

At London Termini 3 minutes to be allowed if possible between arrivals on adjacent platforms to allow customers to clear in the morning and evening peak.

Platform starting signals must not be operated for trains via the Battersea Reversible line until permission has been granted from the Signaller operating Panel 7 at Victoria ASC for the movement to proceed beyond VC541

### Overnight:

Maximum use is to be made of Platforms 12 to 15 (These platforms have access to both Fast Line and Slow Line). The use of Platform 19 should be kept to a minimum because of difficult customer access.

### Use of Platforms:

Diesel unit services and whenever possible diesel hauled trains must only use Platform 18 and 19.

For amended timetable purposes, Gatwick Express have the option of using the following alternative Platforms:

Platform Blocked	Alternative Platform	Remarks
Platform 13	Platform 15	Tractor access gate to open
Platform 14	Platform 12	Tractor access gate to open
Platform 13 & 14	Platform 7 & 8	

## Battersea Pier Junction

### Junction Margins

First Movement	Second Movement	Margin
Pass from Down Brighton Fast to Down Brighton Slow	Pass Battersea Park on Up Brighton Slow towards Victoria	2½
Pass from Down Brighton Fast to Down Brighton Slow	Depart Battersea Park on Up Brighton Slow towards Victoria	1

## Battersea Park

### Connectional Allowances

<b>Battersea Park</b>

Down Slow (Clear of T123)	12		
<b>Platform Reoccupation</b>			
All platforms with following moves		2	
<b>Simultaneous Moves Not Permitted</b>			
<b>First Movement</b>	<b>Second Movement</b>	<b>Reason</b>	<b>Margin</b>
Down train arriving in Platform 5 from either RVL or DFL	Up train arriving at Platform 4	Overlap on 1608A/B points	2
Up train departing Platform 5	Up train arriving Platform 4	Overlap on 1608A/B points	2
<b>Station Working Requirements</b>			
Whenever possible, change of line should be made at North End of station with Northbound services and at South End of station with Southbound services.			
Stopping passenger services from 01.00 to 05.00 should be timed to run via Platforms 5 and 6 where possible			
<b>Planning Note</b>			
Trains formed of a 12 car Class 700 EMUs must not be planned to turnaround in Platforms 3, 4 and 5 due to signal sighting issues for signals at either end of these platforms. However 12 car Class 700 EMUs are however able to use platform 2 for this purpose.			

South Croydon		
Adjustment to Sectional Running Times		
Movement	Reason	Value
All non-freight movements passing through Platform 5 from Down Slow towards Purley	Approach control signal T137	{½}
All movements towards Sanderstead passing South Croydon on the Reversible Line	Speed Differential	{½} approaching South Croydon
Connectional Allowances		
All Services	4	
Junction Margins		
First Movement	Second Movement	Margin
Depart/Pass Platforms 4 or 5 to the Down Slow	Train from Up East Grinstead to Up Slow	2½
Length Limit		
The maximum standage at signal T140 on the Up Slow & T142 on the Reversible Slow to avoid fouling South Croydon Jn is 244 metres/38 SLUs/12 cars (or 10 cars if the train is formed of Class 171 stock).		
Planning Note		
Up trains formed of 12 car class 700 rolling stock must not be planned to call at South Croydon Platform 4 to avoid route locking the junction at the south end of the station		

## Purley Oaks

### Planning Note

Trains must not be planned to call at Purley Oaks Platform 1 due to no station facilities being available

## Purley

### Adjustment to Sectional Running Times

Movement	Reason	Value
All movements to Platforms 5 and 6	Approach Control	{½}
Class 66 Timing Loads which will pass through Platforms 5 or 6 at Purley	Speed Differential	{1}
All movements crossing from Down Fast to Down Slow	Speed Differential on approach	{½} approaching Purley {½} approaching Stoats Nest Junction
All movements crossing from Up Slow to Up Fast	Speed Differential on approach	{½} {½} approaching the next timing point after Purley
Up attachment in platform 5	Calling-on allowance to be added to second train due to restrictive aspect at signals T560 or T576	{1}

### Berthing Facilities

	Cars	Notes
Siding	16	This location is not to be used without prior arrangement
Berthing within the station is permitted in Platform 6 only and is limited to train class 377 and 700 only due to restrictions upon berthing on running lines		

### Connectional Allowances

--------------	---

### Dwell Times

All Peak Services	1
-------------------	---

### Junction Margins

First Movement	Second Movement	Margin
Depart Platform 3, 4 or 5 to Up Fast	Pass Platform 2 on Down Fast	3
Depart Platform 5 to Up Slow	Arrive Platform 5 from Down Slow	2½
Depart Platform 5 towards East Croydon	Pass/arrive Platform 4	3

### Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below -

Platform 1		Prohibited
Platform 2		Prohibited
Platform 3		Prohibited
Platform 4		Attaching Only
Platform 5	Both Directions	Attaching/Detaching
Platform 6	Down Direction	Detaching Only

<b>Purley</b>	
<b>Simultaneous Moves Not Permitted</b>	
Up train departing Platform 4	Up Train arriving Platform 3
Up Train departing Platform 5	Up Train arriving Platform 3
Up Train departing Platform 5	Up Train arriving Platform 4
Down Train departing Platform 5 towards Caterham or Tattenham Corner	Down Train arriving Platform 6
<b>Simultaneous Moves Not Permitted – Freight (Class 4, 6, 7 or non-seasonal Class 8)</b>	
A freight train (as described above) arriving in the Down direction which is running into Purley Yard is required to proceed past signal T167 at the country end of Platform 6 in order to clear the pointwork for the Yard. Under the instructions of the shunter, the train will then be propelled into the Down Siding. Whilst the shunt is taking place no route is available from Platform 5 signal T165 towards Caterham or Tattenham Corner. As soon as the train has cleared Platform 6, a departure towards Caterham or Tattenham Corner from Platform 5 can proceed.	
<b>Station Working Requirements</b>	
<b>Locking and Unlocking Doors</b>	
<b>Purley and Caterham</b>	
When a stopping passenger service is booked to be formed of Class 455 stock in excess of 4 cars, the doors of the rear unit(s) will be locked as necessary between Purley and Caterham. It is only necessary to lock the doors on one side (left in the direction of travel). <i>The allowance for this is 3 minutes to lock or unlock doors.</i>	
<b>Woodmansterne to Tattenham Corner (Down)</b>	
<b>Tattenham Corner to Coulsdon Town (Up)</b>	
When a stopping passenger service is booked to be formed of Class 455 in excess of 4 cars, doors of the rear unit(s) will be locked as necessary between Purley and Tattenham Corner. Because Woodmansterne is an island platform, it is necessary to lock doors on both sides of the unit. <i>The allowance for this is 3 minutes to lock or unlock doors.</i> A service starting from Coulsdon Town (Up Platform) running ECS from Tattenham Corner formed of Class 455 stock in excess of 4 cars requires the doors of rear unit(s) to be locked as necessary. The doors will be locked at Tattenham Corner (3 minute allowance) and unlocked at Purley (3 minute allowance).	

<b>Purley Yard (Days Aggregates)</b>

Platform 3	Down Slow Both Directions	Attaching/Detaching
Platform 4	Up Fast	Prohibited
Platform 5	Down Fast	Prohibited
* Platform Sharing – A second train must arrive in an occupied platform before the first train is allowed to depart		
<b>Platform Reoccupation Margins</b>		<b>Value</b>
Reoccupation of Platforms for following services		2
<b>Simultaneous Moves Not Permitted</b>		
<b>First Movement</b>	<b>Second Movement</b>	<b>Reason</b>
Down Train departing Platform 2 towards Down Slow	Down Train arriving Platform 3	Overlap on signal T277
Down train arriving from Down Fast into Platform 1 or 2	Up Train arriving Platform 3	Overlap on signal T276
<b>Planning Note</b>		
Trains formed of a 12 cars Class 700 must not be planned to turn around in Platform 1 due to signal sighting issues for signals for signals T280 (north end) and T281 (south end).		

<b>Three Bridges Down Thameslink Sidings<sup>^</sup></b>		
<b>Acceptance of trains</b>		
<b>First Movement</b>	<b>Second Movement</b>	<b>Margin</b>
Train departs Three Bridges Platform 5 towards the Down Thameslink Sidings	Train passes or arrives Three Bridges on Down Fast	5

### Three Bridges Down Thameslink Sidings<sup>^</sup>

Train departs Three Bridges Platforms 4 or 5 and enters the Down Thameslink Sidings	Following movement departs Three Bridges into the Down Thameslink Sidings	20
---	---	----

Example, first train departs Three Bridges towards Down Thameslink Sidings at xx.00. Second movement into Sidings can depart Three Bridges at xx.20. This margin provides an allowance for the first train to use the washer, reverse in the headshunt and stable. 8 minutes applies if the second train not washing.

All trains arriving at the Down Sidings must be planned with a 'dot' stop at Three Bridges station. This is because the train will be brought to a stand or near stand at signal T273 before receiving a proceed aspect into the sidings.

#### Berthing Facilities

Siding	Cars*	Notes
Stabling Siding No 1	24	2 x 12 cars, 3 x 8 cars or 1 x 12 car and 1 x 8 car
Stabling Siding No 2	24	2 x 12 cars, 3 x 8 cars or 1 x 12 car and 1 x 8 car
Stabling Siding No 3	16 or 20	1 x 12 car and 1 x 8 car or 2 x 8 cars

\* Assumed to be Class 700 stock

#### Margins between arrivals and departures

First Movement	Second Movement	Margin
Train arrives at Three Bridges Down Thameslink Sidings from Three Bridges station	Train departs from Three Bridges Down Thameslink Sidings towards Three Bridges station	6

#### Margins between successive departures

First Movement	Second Movement	Margin
Train departs from Three Bridges Down Thameslink Sidings and passes Three Bridges station	Following movement departs Three Bridges Down Thameslink Sidings towards Three Bridges station either stopping or not stopping	6
Train departs from Three Bridges Down Thameslink Sidings and stops at Three Bridges station (assumes 1 minute dwell at Three Bridges)	Following movement departs Three Bridges Down Thameslink Sidings towards Three Bridges station either stopping or not stopping	8

#### Planning Note

Pathing or performance allowances must not be placed between Three Bridges and Three Bridges Down Thameslink Sidings in either direction as there are no intermediate signals

<sup>^</sup> Final planning values for Three Bridges Down Thameslink Sidings subject to confirmation.

### Three Bridges Up Thameslink Depot<sup>^</sup>

#### Acceptance of trains

First Movement	Second Movement	Margin
Train departs Three Bridges Platform 2 or 3 and enters the Up Thameslink Depot	Following movement departs Three Bridges into the Up Thameslink Depot	8

Example, first train departs Three Bridges towards Up Thameslink Depot at xx.00. Second movement into Depot can depart Three Bridges at xx.08.

<b>Lovers Walk T&amp;R.S.M.D</b>
<b>Berthing Facilities</b>
Maximum Berthing Capacity and Facilities available should be confirmed with Southern Railway Train Specification & Planning Department

Brighton Down Sidings		
Allowances		
Movement		Value
Allowance for CET on Siding No 1 South prior to movement to Siding No 1 North		{24}
Berthing Facilities		
Siding	Cars	Notes
Siding No 1	24 cars	CET & water at South end of Siding No 1
Siding No 2	12 cars	CET & water
Siding Numbers to be shown as follows:		

## Brighton Down Sidings

Siding No 1 North - 1N, Siding No 1 South - 1S, Siding No 2 - 2

### Headways

Headway between consecutive arrivals on No 1 Siding	42 if first train washes and has CET (assumes first movement is to Siding 1 North) 18 if first train washes but has no CET (assumes first movement is to Siding 1 North).
Arrival on Siding No 1 followed by arrival on Siding No 2	14
Arrival on Siding No 2 followed by arrival on Siding No 1	14
Departures to Brighton station	12

### Permissive Working

Permissive working is authorised as shown below -

Siding No 1	Permissive working allowed at the south end only (i.e. the 12 car length of siding alongside CET apron), north end 12 car siding is not permissive.
Siding No 2	Permissive working allowed

## Brighton Reception Road

### Special Working Requirements

An 'OP' dot stop is required for class 700 trains going to Brighton Down Sidings

Brighton		
Adjustment to Sectional Running Times		
Movement	Reason	Value
Movements to Platforms 3 and 8 where platforms are already occupied	Approach Control for Permissive Working	{½}
Berthing Facilities		
	Cars	Notes
Platforms 1-8	44	
Connectional Allowances		
All Services except as below	10	
All Southern Services	4	
Junction Margins & Platform Reoccupation		
Movement	Margin	
Platforms 1 and 2, between all conflicting movements and platform reoccupation	3	
Platforms 3, 4, 5 and 6 between all conflicting movements and platform reoccupation	4	
Platforms 7 and 8 where movement is to/from East Coastway, between all conflicting movements and platform reoccupation	3	
Platforms 7 and 8 where movement is to/from Preston Park, between all conflicting movements and platform reoccupation	4	
Minimum Turnround – Passenger Services		
	Value	
Services formed of up to 8 cars from the Brighton Main Line (passenger to passenger)	10	
Services formed of up to 8 Cars from the East or West Coastway (passenger to passenger)	7	
Services formed of 9 to 12 Cars (passenger to passenger)	12*	
* 10 minutes can be applied if the previous and next turnrounds at Bedford or Cambridge are 15 minutes or more		
Permissive Working		
Attaching/Detaching and Platform Sharing is authorised as shown below -		
Platform 1	Attaching/Detaching and Platform Sharing – Class 1 and 3 are allowed and trains formed of locomotive and coaching stock	
Platform 2	Attaching/Detaching and Platform Sharing	
Platform 3	Attaching/Detaching and Platform Sharing – Class 1 and 3 are allowed and trains formed of locomotive and coaching stock	
Platform 4	Attaching/Detaching and Platform Sharing	
Platform 5	Attaching/Detaching and Platform Sharing	
Platform 6	Attaching/Detaching and Platform Sharing	
Platform 7	Attaching/Detaching and Platform Sharing	
Platform 8	Attaching/Detaching and Platform Sharing	
Planning Note		
Where possible a departure from Platform 7 towards London Road (Brighton) should not be planned simultaneously with an arrival into Platform 8 from London Road (Brighton). This is because the route setting out of Platform 7 will default to the second set of crossovers at the north end of the platform which prevents a route being set into Platform 8.		
Planning Restriction		
Due to route setting, trains planned to depart to Brighton Down Sidings, cannot be done from Platforms 5 or 7.		
Station Working Requirements		
Access to Platforms		

<b>Brighton</b>	
Platform 1	For use by West Coastway services ONLY
Platform 2	For use by West Coastway services. Direct movements to/from Lovers Walk Depot must be maximum 160 metres/25 SLUs/8 coaches.
Platform 3 (full length) Platform 3 North (3N) Platform 3 South (3S)	<ul style="list-style-type: none"> <li>- When running no longer than 77 metres/12 SLUs/4 coaches (or one 3-car Class 158 or one 2-car Class 171) on to the buffer stop this platform is accessible by any route (3S). When longer than 77 metres/12 SLUs/4 coaches the West Coastway route is not accessible</li> <li>- It is possible to run 4 or more coaches onto 4 coaches from all routes except the West Coastway (3N).</li> <li>- Due to the position of the track circuits it is not possible to run 4 coaches onto 8 coaches already occupying the platform except from Lovers Walk Depot (full length)</li> </ul>
Platform 4	<ul style="list-style-type: none"> <li>- Accessible by any route except the West Coastway</li> <li>- Class 377 units should not be booked to attach to another 4 car already in the platform as this is not possible due to curvature at the South end of platform.</li> </ul>
Platform 5 - 8	Accessible by any route except the West Coastway
<b>Brighton Class 1 Services</b>	
These services should not be booked into platform 3 and 8 as both routes are approach controlled from signal T435. These services should also not be booked to enter an occupied platform, as approach control is required	
<b>Front Train Working</b>	
In the event of a front train working with 2 or more loaded services a minimum of 5 minutes should be allowed between departure of front train and rear train to allow indicators etc to be changed.

Platform 10	Only 8 cars permitted if Class 171/Only 5 cars permitted if Class 442
Platform 11	Only 10 cars permitted if Class 171
Platform 12	Only 10 cars permitted if Class 171
Platform 13	Only 10 cars permitted if Class 171
Platform 14	Only 10 cars permitted if Class 171
Platform 15	Only 8 cars permitted if Class 171/Only 5 cars permitted if Class 442

## SO510 LONDON BRIDGE TO EPSOM DOWNS

### London Bridge

#### Station Working Requirements

#### ECS Movements

ECS movements to Selhurst T&R.S.M.D after the morning peak are to be routed via Streatham Common unless prior agreement is reached with Network Rail

ECS movements To/From Streatham Hill should be routed via Crystal Palace unless prior agreement is reached with Network Rail

At London termini 3 minutes to be allowed if possible between arrivals on adjacent platforms to allow customer to clear in the morning and evening peak.

#### Platforming

In the event of a front train working with 2 or more loaded services a minimum of 5 minutes should be allowed between departure of front train and rear train to allow indicators etc to be changed

### South Bermondsey Junction

See entry under route – SO680

### Brunswick Court Junction

#### Planning Note

Pathing or performance allowances must not be placed between London Bridge and Brunswick Court Junction in either direction as there are no intermediate signals

#### Planning Restriction

Crossing moves at Brunswick Court Junction hold the overlaps of the down direction signals protecting the junction thereby preventing conflicting departures from London Bridge.

### New Cross Gate Up Sussex Loop

#### Planning Note

No pathing time to be shown for a train departing/passing the Up Sussex Loop in the Up direction between the Loop and Bricklayers Arms Junction as there is no protecting signal between these locations. Any pathing time required to follow a preceding service should be shown as a dwell in the Loop.

### New Cross Gate

#### Connectional Allowances

All Services	4

### Three Bridges Tilgate Sidings\*

#### Acceptance of trains

First Movement	Second Movement	Margin
Train departs Three Bridges Platforms 2 or 3 and enters the Three Bridges Tilgate Sidings	Following movement departs Three Bridges into the Three Bridges Tilgate Sidings	8*

\* Example, first train departs Three Bridges towards Three Bridges Tilgate Sidings at xx.00. Second movement into Three Bridges Tilgate Sidings can depart Three Bridges at xx.08. This margin provides an allowance for the first train to arrive in the relevant siding and stable.

All trains arriving at the Three Bridges Tilgate Sidings must be planned with a 'dot' stop at Three Bridges station. This is because the train will be brought to a stand or near stand at signal T277 or T279 before receiving a proceed aspect into the depot.

3 or 4 car trains of classes 377, 387 and 455 rolling stock must not be planned to run to/from Tilgate Sidings to avoid a significant gapping risk at signal TD98 and across crossovers TD29a/b, 1754 a/b and 1752 a/b

#### Berthing Facilities

Siding	Cars*	Notes
Stabling Siding No 1	8	1 x 8 car and CET facility
Stabling Siding No 2	8	1 x 8 car and CET facility
Stabling Siding No 3	8	1 x 8 car and CET facility
Stabling Siding No 4	8	1 x 8 car and CET facility
Stabling Siding No 5	8	1 x 8 car and CET facility

\* Assumed to be Class 700 stock

#### Margins between arrivals and departures

First Movement	Second Movement	Margin
Train arrives at Three Bridges Tilgate Sidings from Three Bridges station	Train departs from Three Bridges Tilgate Sidings towards Three Bridges station	6

#### Margins between successive departures

First Movement	Second Movement	Margin
Train departs from Three Bridges Tilgate Sidings and passes Three Bridges station	Following movement departs Three Bridges Tilgate Sidings towards Three Bridges station either stopping or not stopping	6
Train departs from Three Bridges Tilgate Sidings and stops at Three Bridges station (assumes 1 minute dwell at Three Bridges)	Following movement departs Three Bridges Tilgate Sidings towards Three Bridges station either stopping or not stopping	8

\* Final planning values for Tilgate Sidings subject to confirmation.

Depart Platform 2 towards Pevensey and Westham	Arrive Platform 2 from Pevensey and Westham having called at Cooden Beach and Collington	6*

\* When shunt moves are taking place at Bexhill stopping services should not be timed to depart Cooden Beach until 1 minute after the train in front has departed Bexhill platform 2 in either direction due to the protecting signal for the crossover at Bexhill being situated prior to Collington

### Operating Restrictions

Trains stood at shunt signal 1435 can only be signalled into platform 2 using the crossover. No route is available from this signal to reverse back into platform 1.

## St Leonards West Marina CSD

### Acceptance of Trains into CSD

- When the Down Siding (CWM/CET road) is occupied by an incoming movement no other train can be accepted into West Marina from the Main Line via either route
- When the Shunt Neck is occupied, another movement may be accepted into, or allowed out of St Leonards Railway Engineering Ltd (via either route) but the first train must remain in the Shunt Neck until the second movement has been completed
- When the Down Siding (CWM/CET road) is occupied by: An outgoing movement, a berthed train or a T4 possession; another train can be accepted into the Shunt Neck or St Leonards Railway Engineering Ltd, subject to the provisions of clause 2 above

Trains To/From the CSD may either be driven by a Driver or by a Shunt Driver, but the following must be noted:

## St Leonards West Marina CSD

If the Shunter Driver is taking a train from the Shunt Neck to the Carriage Shed, then he is unable to accept a further movement from the Main Line by either route for some 14 minutes after the train has left the Shunt Neck. If a Driver is provided, this is reduced to 2 minutes

If Shunter Driver is bringing a train from the Carriage Shed into the Shunt Neck, he will be unable to accept trains for some 10 minutes before the train is due to leave the Carriage Sidings, until 9 minutes after the train has arrived in the Shunt Neck under clause 2, or until after the train has departed by other clauses.

Platform 4	Prohibited

Provided it is not propelled, a Class 1, 2, 5 or 0 train may be allowed to enter a platform line which is already occupied by one of these classes

## SO645 BATTERSEA PARK TO PECKHAM RYE (ATLANTIC LINES)

### Peckham Rye

Refer to Kent Timetable Planning Rules – SO680

## SO650 BALHAM JUNCTION TO BECKENHAM JUNCTION

### Streatham Hill

#### Berthing Facilities

Location	Cars	Notes
Shed	68	Carriage Washing Facilities
Down Sidings	72	

#### Limit of Shunt

	Length Limit
Up Crystal Palace (Clear of VC704)	8

#### Planning Note

When a train is formed of rolling stock forming multiple unit Class 455 or Class 171 stock, this cannot reverse at shunt signal 157 as there is no walkway to accommodate non walk-through trains.

### Leigham Junction

#### Length Limit

The maximum standage at signal VC712 on the Up Leigham Spur is 200 meters/31 SLUs/10 cars (or 8 cars if the train is formed of Class 171 stock).

### West Norwood Junction

#### Adjustment to Sectional Running Times

Movement	Reason	Value
All Up trains towards Tulse Hill – value to be inserted approaching West Norwood Junction	Approach Control at signal VC716	{½}

## West Norwood Junction

### Length Limit

The maximum standage at signal VC715 on the Down West Norwood Spur is 160 meters/25 SLUs/8 cars (or 6 cars if the train is formed of Class 171 stock).

### Simultaneous Moves Not Permitted

First Movement	Second Movement	Margin
Train formed of Class 442 stock passes West Norwood Junction having travelled from Tulse Hill	Train passes West Norwood Junction travelling towards Tulse Hill	2
Train passes West Norwood Junction having travelled from Tulse Hill	Train formed of Class 442 stock passes West Norwood Junction travelling towards Tulse Hill	2

## Beckenham Junction

Refer to Kent Timetable Planning Rules – SO110

## SO650A BROMLEY JUNCTION TO NORWOOD JUNCTION

### Norwood Junction

See entry under route – SO510

## SO660 PURLEY TO CATERHAM

### Purley

See entry under route – SO500

## Caterham

### Berthing Facilities

Location	Cars	Notes
Platform 1	8	
Platform 2	8	
Siding	8	8 car trains (except Class 377) must not run to/from Siding under DOO conditions as the driver is unable to change ends.

### Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below -

Platform 1	Attaching/Detaching and Platform Sharing
Platform 2	Attaching/Detaching and Platform Sharing

### Station Working Requirements

Locking and Unlocking Doors between Purley and Caterham

When a stopping passenger service is booked to be formed of Class 455 stock in excess of 4 cars in the Down direction and 6 cars in the Up direction, doors of the rear unit(s) will be locked as necessary between Purley and Caterham. It is only necessary to lock the doors on one side (left in the direction of travel). *The allowance for this is 3 minutes to lock or unlock doors*

## SO660A CHIPSTEAD LINE JUNCTION TO TATTENHAM CORNER

### Coulsdon Town

#### Station Working Requirements

##### Woodmansterne to Tattenham Corner (Down)

##### Tattenham Corner to Coulsdon Town (Up)

When a stopping passenger service is booked to be formed of Class 455 stock in excess of 4 cars, doors of the rear unit(s) will be locked as necessary between Purley and Tattenham Corner. Because Woodmansterne is an Island Platform, it is necessary to lock doors on both sides of the unit  
*The allowance for this is 3 minutes to lock or unlock doors*

A service starting from Coulsdon Town (Up Platform) running ECS from Tattenham Corner formed of Class 455 stock in excess of 4 cars requires the doors of the rear unit(s) to be locked as necessary. The doors will be locked at Tattenham Corner (3 minute allowance) and unlocked at Purley (3 minute allowance)

**Note:** Down services formed of Class 455 stock in excess of 4 cars must NOT be booked to terminate in the Up Platform

### Woodmansterne

#### Station Working Requirements

##### Woodmansterne to Tattenham Corner (Down) / Tattenham Corner to Coulsdon Town (Up)

When a stopping passenger service is booked to be formed of Class 455 stock in excess of 4 cars, doors of the rear unit(s) will be locked as necessary between Purley and Tattenham Corner. Because Woodmansterne is an Island Platform, it is necessary to lock doors on both sides of the unit  
*The allowance for this is 3 minutes to lock or unlock doors*

A service starting from Coulsdon Town (Up Platform) running ECS from Tattenham Corner formed of Class 455 stock in excess of 4 cars requires the doors of the rear unit(s) to be locked as necessary. The doors will be locked at Tattenham Corner (3 minute allowance) and unlocked at Purley (3 minute allowance)

### Tattenham Corner

#### Berthing Facilities

Location	Cars	Notes
Platform 1	8	
Platform 2	8	
Platform 3	8	
Up Siding	20	

#### Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below -

Platform 1	Attaching/Detaching and Platform Sharing
Platform 2	Attaching/Detaching and Platform Sharing
Platform 3	Attaching/Detaching and Platform Sharing

## Tattenham Corner

### Station Working Requirements

#### Woodmansterne to Tattenham Corner (Down)

#### Tattenham Corner to Coulsdon Town (Up)

When a stopping passenger service is booked to be formed of Class 455 stock in excess of 4 cars, doors of the rear unit(s) will be locked as necessary between Purley and Tattenham Corner. Because Woodmansterne is an Island Platform, it is necessary to lock doors on both sides of the unit

*The allowance for this is 3 minutes to lock or unlock doors*

A service starting from Coulsdon Town (Up Platform) running ECS from Tattenham Corner formed of Class 455 stock in excess of 4 cars requires the doors of the rear unit(s) to be locked as necessary. The doors will be locked at Tattenham Corner (3 minute allowance) and unlocked at Purley (3 minute allowance)

Minimum use should be made of Platform 1 and Platform 3 if possible during Winter Timetables due to icing conditions

## SO680 SOUTH BERMONDSEY JUNCTION TO HORSHAM

### South Bermondsey Junction

#### Planning Note

Pathing or performance allowances must not be placed between South Bermondsey Junction and South Bermondsey in either direction as there are no intermediate signals.

*If pathing time is required approaching South Bermondsey Junction from Old Kent Road Junction, an OP stop should be applied at South Bermondsey instead*

## South Bermondsey

### Adjustment to Sectional Running Times

Movement	Reason	Value
Up trains terminating in Platform 2	Approach Control on signal TL4220	{1/2}

#### Planning Note

Pathing or performance allowances must not be placed between South Bermondsey Junction and South Bermondsey in either direction as there are no intermediate signals

### Platform Reoccupation Margin

First Movement	Second Movement	Margin
Train departs Platform 2	Train arrives Platform 2	4

## Peckham Rye

### Connectional Allowances

## 5.5 Timing Allowances

All allowances shown are in minutes.

SX Daytime allowances apply at all times except where specified differently in Sections 5.5.2, 5.5.3, 5.5.4, 5.5.5 and 5.5.6 The locations at which allowances are included within a Train Slot may vary. The total allowance included within a Train Slot will not exceed the maximum value allowed.

All allowances are indicative for the Final Principal Rules and are subject to change.

E [ ] refers to engineering allowance

P < > refers to performance allowances

A { } refers to adjustment allowances (passing over slow crossovers etc.)

SO500 LONDON VICTORIA TO BRIGHTON			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Clapham Junction	P	½	All down trains from Victoria
Approaching Purley	P	1	All up trains from Caterham or Tattenham Corner unless replaced by a {1} calling on allowance when attaching
Approaching Gatwick Airport on Down Fast	E	1	To mitigate against 30mph TSR through Platform 7 at Gatwick Airport whilst it is closed. Applies to non-stop services only
Approaching Three Bridges on Down Fast	E	1	To mitigate against 30mph TSR through Platform 7 at Gatwick Airport whilst it is closed. Applies to non-stop services only
SO500C PRESTON PARK TO HOVE			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Preston Park	P	1	All up trains from the West Coastway route
SO510 LONDON BRIDGE TO EPSOM DOWNS			
TIMING SECTION	TYPE	EMU	REMARKS
Between Blackfriars Junction and Bricklayers Arms Junction	P	2	All down trains from the Thameslink Core must have a minimum of <2> minutes between Blackfriars Junction and Bricklayers Arms Junction, <1> minute of which must be placed approaching London Bridge
Between Bricklayers Arms Junction and Blackfriars Junction	P	2	All up trains to the Thameslink Core must have a minimum of <2> minutes between Bricklayers Arms Junction and Blackfriars Junction, <1> minute of which must be placed approaching Blackfriars Junction
SO520 THREE BRIDGES TO HAVANT VIA HORSHAM			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Three Bridges	P	1	All up trains originating from south of Horsham
Approaching Arundel Junction	P	1	All trains that have not started from Littlehampton, Bognor or Barnham
SO590 KEYMER JUNCTION TO EASTBOURNE			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Keymer Junction	P	1	All up trains from Lewes
SO700 STREATHAM SOUTH JUNCTION TO SUTTON (VIA WIMBLEDON)			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Sutton	P	1	Trains arriving at Sutton via Wimbledon

**Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.**

## **SIMBIDS**

Timing allowances for all trains for SIMBIDS operation: (additional allowance to operate in reverse direction):-

- Between Balcombe Tunnel Junction and Copyhold Junction - on both Up and Down lines
- Between Copyhold Junction and Haywards Heath - on both Up and Down lines
- Between Haywards Heath and Wivelsfield - on both Up and Down lines
- Between Wivelsfield and Preston Park - on both Up and Down lines

## **6 Timetabling Considerations**

### **6.1 Advertised and Working Times**

Advertised Times maybe amended by agreement between Train Operator and Network Rail

## 6.2 Timing of Light Locomotives

It is a general Principal that all light locomotive movements will be timed. Any exceptions to this must be agreed by the appropriate Area Timing Specialist.

**Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.**

Train formation	Permissible speed	
	90 mph or above	85 mph or less
Any number of locomotives running light, or one or two locomotives with one, two or three vehicles, or three or more locomotives and any number of vehicles	75 mph	60 mph

Train formation	Permissible speed		
	100 mph or above	90 or 95 mph	80 or 85 mph
A locomotive with four, five or six vehicles, or two locomotives and from four to 10 vehicles	90 mph	80 mph	75 mph

## 6.3 Two-Track Railway Timetable

**For two-track times, please refer to Section 4 within the Engineering Access Statement**

**During periods when the Brighton Main Line timetable is planned to run over two tracks instead of four, the following allowances are to be added to allow for crossing movements between Fast/Quarry and Slow Lines.**

### **Down**

{½}	approaching Balham
{½}	approaching Stoats Nest Junction
{½}	approaching Earlswood
{½}	approaching next timing point after Earlswood
<1>	approaching Gatwick Airport (GTR services only)

### **Up**

{½}	approaching Earlswood
{1}	approaching next timing point after Earlswood
{½}	approaching Stoats Nest Junction
{½}	approaching Balham
<1>	approaching East Croydon (GTR services only)
