## Commentary on the Anglia Timetable Planning Rules 2021

### Version 4.0

### Final Principal and Final Proposal for Subsidiary Change Timetable 2021

This document is a covering note for the Timetable Planning Rules – Final Principal and Final Proposal for Subsidiary Change Timetable 2021 – and provides a specific commentary to the route described above.

In the Timetable Planning Rules document each change in content is indicated by the following convention:

New or Amended text is red
Deleted text is green and struck through

The change is also highlighted with a thick vertical line at the right hand side of the page.

The following is a summary of changes in content from Version 3.0 of the 2021 Timetable Planning Rules.

## 1 Introduction and General Notes

### 1.3 Definitions

#### 1.3.1 Train Classification

Notes on Cheshunt and Hertford East services amended

#### 1.3.4 Line Codes

Line code PL added

## 2 Route Description

### 2.1 Planning Geography

<b>EA 1013</b>	Timing point for Norwich TC added
	Timing point for Norwich Station Jubilee Sidings amended
<b>EA 1090</b>	Timing point for Clacton Signal CO1180 added
	Timing point for Clacton Signal CO1183 added
	Timing point for Clacton Wash Road amended
	Timing point for Clacton Down Sidings added
	Timing point for Clacton Run Round Road added
<b>EA 1161</b>	Route code at Cambridge added
	Route code at Cambridge Reception Roads 1 & 2 added
	Route code at Mill Road Junction added
<b>EA 1320</b>	Note at Highbury & Islington amended
	Note at Canonbury amended
<b>EA 1370</b>	Timing point for Barking Signal UR1103 added

<b>EA 1380</b>	Route code at Barking removed
<b>EA 1390</b>	Timing point for Barking Signal UR1104 added Timing point for Barking Riverside Up Junction added Timing point for Barking Ripple Road Junction added Timing point for Ripple Lane West Junction added Timing point for Barking Riverside Down Junction added Timing point for Barking Riverside added
<b>EA 1440</b>	Timing point for Trimley Signal FW9029 amended Timing point for Trimley Signal FW9031 added
<b>EA 1470</b>	Timing point for Crown Point Signal CP1498 added

## **4 Rolling Stock Restrictions**

### **4.7 Driver Only Operation Limits**

<b>EA 1010</b>	Passenger column amended
<b>EA 1011</b>	Passenger column amended
<b>EA 1060</b>	Passenger column amended
<b>EA 1070</b>	Passenger column amended
<b>EA 1090</b>	Passenger column amended
<b>EA 1100</b>	Passenger column amended
<b>EA 1310</b>	Route Section amended
<b>EA 1320</b>	Route Section amended
<b>EA 1370</b>	Location of table amended

## **5 Running Times, Margins and Allowances**

### **5.1 Sectional Running Times**

#### **5.1.3 New and Revised Sectional Running Times**

SRT changes are being included in Anglia Timetable Planning Rules 2021 Version 3.0 and will be sent to all TPR Forum participants. Summary of the changes:

<b>EA 1013</b>	ECS SRTs for Norwich Sidings route codes amendments
<b>EA 1310</b>	Freight SRTs from stop at South Acton
<b>EA 1330</b>	Freight SRTs to South Acton
<b>EA 1370</b>	Freight SRTs Woodgrange Park to Barking Station Junction
<b>EA 1390</b>	SRTs for new timing points in Ripple Lane/Barking Riverside area
<b>EA 1440</b>	SRTs for new timing point Trimley Signal FW9031

### **5.3 Junction Margins and Station Planning Rules**

<b>Standard Values</b>	Generic Rolling Stock Class for Class 387 added Minimum Turnaround for Class 720 amended
<b>EA 1010</b>	Ilford - Junction margins amended Seven Kings - Junction margins amended

<b>EA 1011</b>	Shenfield - Junction margins amended Witham - Converging margins amended Marks Tey - Adjustments to Sectional Running Times amended Colchester - Adjustments to Sectional Running Times amended - Junction margin amended Manningtree North Junction - Junction margins amended
<b>EA 1013</b>	Norwich - Junction margin amended
<b>EA 1080</b>	Sudbury - Minimum turnround time added
<b>EA 1160</b>	Broxbourne - Dwell Time amended
<b>EA 1161</b>	Stansted Mountfitchet - Junction margins amended
<b>EA 1200</b>	Chingford - Junction margin wording amended
<b>EA 1310</b>	Kentish Town West - Platform Re-occupation values amended Gospel Oak - Platform Re-occupation values amended Hampstead Heath - Platform Re-occupation values amended Finchley Road & Frognal - Platform Re-occupation values amended West Hampstead - Platform Re-occupation values amended Brondesbury - Platform Re-occupation values amended Brondesbury Park - Platform Re-occupation values amended Kensal Rise - Platform Re-occupation values amended Willesden Junction High Level - Minimum Turnround Time removed Richmond - Minimum Turnround Time removed
<b>EA 1320</b>	Camden Road - Minimum Turnround Times removed Dalston Kingsland - Minimum Turnround Times removed Hackney Wick - Minimum Turnround Time removed
<b>EA 1370</b>	Upper Holloway - Minimum Turnround Time removed
<b>EA 1390</b>	Ripple Lane West Yard - Loop lengths amended
<b>EA 1530</b>	Dullingham - Single Line Crossing wording amended

#### **5.4 Platform Lengths**

Lengths for Cambridge amended

Note for Enfield Town removed  
Lengths at Rotherhithe removed  
Length at Wanstead Park amended

## **5.5 Timing Allowances**

<b>EA 1012</b>	Performance allowance at Trowse Junction removed
<b>EA 1161</b>	Note at Shepreth Branch Junction added

These represent the revised Timetable Planning Rules (the “Final Rules”) for the Subsidiary Change 2021 timetable in accordance with Part D of the Network Code, Condition D2.2.3.

As per Condition D2.2.8 of Part D of the Network Code, any Timetable Participant dissatisfied with any decision of Network Rail in respect of those Rules is entitled to appeal against any part of it. Any such appeal shall be conducted in accordance with Condition D 5 of Part D of the Network Code and must be made by a Timetable Participant and initiated in accordance with Network Code Part D Condition D2.2.8 (a) and (b).

Regards

# 1 Introduction and General Notes

Network Rail provide the Timetable Planning Rules document to Train Operators and other interested parties to set out the rules which are applicable to Access Requests for scheduling of train paths on the Network Rail network. Separate sections of Timetable Planning Rules are prepared for each Route with a National Timetable Planning Rules document setting out procedures to be followed and other nationally applicable rules.

Network Rail will determine the contents of Timetable Planning Rules through consultation with Train Operators with the primary aim of achieving the optimal balance between access to the network for train operations and performance robustness of the resulting train plan. This consultation is in line with the Network Code Part D, and Train Operators have a right of appeal to Timetabling Sub-Committee against the contents of the Final Timetable Planning Rules.

Final Timetable Planning Rules are issued with timetable Access Request Information before the commencement of the development period for the Principal Change timetable to which the Rules apply and cover a 12-month period. Revised Timetable Planning Rules are issued with timetable Access Request Information before the commencement of the Subsidiary Change timetable development period and show changes applicable to the Subsidiary Change timetable period which have been agreed since the issue of the annual Timetable Planning Rules.

Timetable Planning Rules may be changed only through this twice-yearly process or by the change procedure described in the National Timetable Planning Rules

Train Operators' Access Requests for train paths must be compliant with Timetable Planning Rules. If a Train Operator wishes to submit an Access Request for a train path which is not compliant with Timetable Planning Rules it should consult the Network Rail Capacity Planning team to establish whether an amendment to Timetable Planning Rules is likely to be agreed and, if appropriate, submit an amendment proposal which will be considered by Network Rail in accordance with the Change Procedure set out in the National Timetable Planning Rules. The Timetable Planning Rules amendment proposal should be submitted to Network Rail as early as possible and certainly no later than the time of submission of the Access Request. If the proposed change is likely to involve the calculation of new sectional running times or a physical investigation then the Train Operator should liaise with the Capacity Planning team to establish a realistic timescale for evaluation of the proposed change before submission of the Access Request.

## 1.1 Index of Routes

Information arranged on a line of route basis in this document is presented in the following order:

EA 1010	Liverpool Street to Seven Kings
EA 1011	Seven Kings to Ipswich
EA 1012	Ipswich to Trowse Junction
EA 1013	Trowse Junction to Norwich
EA 1020	Carpenter's Road South Junction to Carpenter's Road North Junction
EA 1030	Forest Gate Junction to Woodgrange Park Junction
EA 1040	Romford to Upminster
EA 1050	Shenfield Junction to Southend Victoria
EA 1060	Wickford Junction to Southminster
EA 1070	Witham Junction to Braintree
EA 1080	Marks Tey Junction to Sudbury
EA 1090	Colchester Junction to Clacton-on-Sea
EA 1100	East Gate Junction & Hythe Junction to Colchester Town
EA 1110	Thorpe-le-Soken Junction to Walton-on-the-Naze
EA 1120	Manningtree to Harwich Town
EA 1130	Griffin Wharf Branch
EA 1140	Ipswich Docks Branch
EA 1150	Channelsea South Junction to Stratford Central Junction West
EA 1160	Bethnal Green East Junction to Bishop's Stortford
EA 1161	Bishop's Stortford to Ely North Junction
EA 1162	Ely North Junction to King's Lynn
EA 1170	Hackney Downs North Junction to Enfield Town
EA 1180	Reading Lane Junction to Navarino Road Junction (Graham Road Curve)
EA 1190	Bury Street Junction to Cheshunt Junction
EA 1200	Clapton Junction to Chingford
EA 1210	Broxbourne Junction to Hertford East
EA 1220	Stansted South & North Junctions to Stansted Airport
EA 1230	Royston to Shepreth Branch Junction
EA 1270	King's Lynn Junction to Middleton Towers
EA 1280	Stratford Central Junction to Coppermill Junction
EA 1290	Tottenham South Junction to South Tottenham East Junction
EA 1300	South Tottenham West Junction to Seven Sisters Junction
EA 1310	Camden Road West Junction to Richmond
EA 1320	Camden Road West Junction to Stratford Platforms 1 & 2
EA 1330	South Acton Junction to Old & New Kew Junctions
EA 1340	Stratford Lea Junction to High Meads Junction
EA 1350	Channelsea North Junction to Temple Mills East Junction
EA 1360	Dudding Hill Junction to Acton Wells Junction
EA 1370	Gospel Oak Junction to Barking Tilbury Line Junction West
EA 1380	Fenchurch Street to Shoeburyness
EA 1390	Barking Tilbury Line Junction East To Pitsea Junction (Via Tilbury)
EA 1400	Gas Factory Junction to Bow Junction
EA 1410	Upminster to West Thurrock Junction
EA 1420	Thames Haven Junction to London Gateway Port/Thames Haven Sidings
EA 1430	East Suffolk Junction to Oulton Broad North Junction
EA 1440	Westerfield Junction to Felixstowe Town
EA 1450	Trimley To Felixstowe North and Central Terminals
EA 1460	Felixstowe Beach Junction to Felixstowe Beach (for Felixstowe South Quay Freightliner Terminal)
EA 1470	Norwich Thorpe Junction and Trowse Swing Bridge to Lowestoft
EA 1480	Whitlingham Junction to Cromer
EA 1490	Cromer to Sheringham
EA 1500	Brundall Junction to Yarmouth

EA 1510	Reedham Junction to Yarmouth
EA 1520	Saxmundham Junction to Sizewell
EA 1530	Coldham Lane Junction to Haughley Junction
EA 1540	Chippenham Junction to Ely Dock Junction
EA 1550	Ely North Junction to Ely West Junction (Ely West Curve)
EA 1560	Ely North Junction to Kings Dyke (inclusive)
EA 1570	March East & West Junctions to Wisbech
EA 1580	Ely North Junction to Trowse Junction
EA 1744	Boss Hall Junction to Europa Junction – Bacon Factory Curve

## 1.2 Sectional Appendices and Rule Book

### 1.2.1 Sectional Appendix

The Sectional Appendix to the Working Timetable and Books of Rules and Regulations shall be used.

The Sectional Appendix is the sole source of information regarding the following:

Electrification limits refer to relevant Table 'A'.

Permissive Working refer to relevant Table 'A', then see below.

Route Clearance refer to 'tab' associated with relevant Table 'A'

To identify the type of Permissive Working that applies at a given location, refer to the appropriate Sectional Appendix Table A for that location. If there is authority for Permissive Working, this will appear in the Signalling and Remarks. There are different authorities that depend upon the signalling and layout of the location. The following list identifies the types of Permissive Working that will appear in the Sectional Appendix.

Type	Description
PP	Permissive Working – Full use for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – A	Permissive Working – Attaching and Detaching use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – C	Permissive Working – Contingency use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – S	Permissive Working – Platform Sharing use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PF	Permissive Working – For class 3 to 8 and 0 trains

*Source: Sectional Appendix – General Instructions – National - Explanation of Table A terms and symbols*

## 1.2.2 Rule Book

The following Modules of the Rule Book GE/RT8000 affects all sections unless specified. The sections listed affect railway operations and train movements. The listed section does not apply to Train Planning directly, but its application will affect how trains operate, and it is for that reason the item appears here.

RULE BOOK MODULE	SECTION	NOTES
G1 General safety responsibilities and personal track safety for non-track workers	5.5 Using the phonetic alphabet	Operational principles
OTM Working of on-track machines (OTM)	2.2 Before starting a journey	TPR Section 4.6
	5.6 Carrying out a running brake test	TPR Section 5.1.2
P1 Single line working	6.5 Warning anyone working on or near the line used for single line working	When planning Single Line Working
	9.3 Right-direction movements	
	9.4 Wrong-direction movements	
S1 Signals and indicators controlling train movements		Operational principles
S2 Observing and obeying fixed signals	3.1 Passenger train at a position-light, shunt-ahead or shunting signal	Operational principles
SP Speeds	2.4 Differential permissible speed indicators	TPR Section 5.1.2
	2.5 Permissible speed indicators with letters	TPR Section 5.1.2
	2.6 Enhanced permissible speed (EPS) indicators	TPR Section 5.1.2
T11 Movement of engineering trains and on-track plant under T3 arrangements	3 Movements entering the possession	When planning trains entering possessions
	7 Instructing the driver or machine controller	When planning trains entering possessions
TW1 Preparation and movement of trains General	7.1 Authority and arrangements for movements (Hauling dead traction units)	Operational principles
TW2 Preparation and movement of multiple-unit passenger trains	6.5 Carrying out a running brake test	TPR Section 5.1.2
TW3 Preparation and movement of locomotive hauled trains (including HSTs, push-pull, postal, parcels)	2.1 Locomotives running light or hauling trains (Maximum speed of);	TPR Section 5.1.2
	2.2 Maximum permitted speed of locomotive-hauled trains	TPR Section 5.1.2
	2.3 Electric-traction speed restrictions	TPR Section 5.1.2
	3.16 Carrying out a running brake test	TPR Section 5.1.2
	Section 14.1 Working trains with locomotives at both ends, when this type of working is permitted	Operational principles

RULE BOOK MODULE	SECTION	NOTES
Rule Book Handbook 5 Handsignalling Duties	Section 5.2 Entrance signal	When planning Temporary Block Working (TBW)
	5.3 Exit signal	When planning Temporary Block Working (TBW)
	5.4 Where TBW is divided into two sections	When planning Temporary Block Working (TBW)

## 1.3 Definitions

The list below is not an exhaustive one but is intended to give readers an understanding of some of the terminology as used for the purposes of this document.

If any term in Timetable Planning Rules is unclear, please contact the compiler on the telephone number shown on the cover.

### 1.3.1 Train Classification

First Character	Description
1	Express passenger train; or Nominated postal or parcels train; or Breakdown or overhead line equipment train going to clear the line or returning from there (1Z99); or Traction unit going to assist a failed train (1Z99) Snow plough going to clear the line (1Z99)
2	Ordinary passenger train; or Breakdown or overhead line equipment train not going to clear the line (2Z99) Officers' special train (2Z01)
3	Freight train which can run at more than 75 mph; or A parcels train; or Empty coaching stock train if specially authorised
4	Freight train which can run up to 75 mph
5	Empty coaching stock train
6	Freight train which can run up to 60 mph
7	Freight train which can run up to 45 mph
8	Freight train which can run at, or is timed to run at, 35 mph or less
9	Thameslink services to or from St Pancras Low Level and beyond MTR Crossrail services through the Crossrail Central Operating Section GA Norwich in 90 services c2c services to/from London Liverpool Street A train formed of a Class 373 unit. Passenger services for East London line
0	Light locomotive or locomotives

Source: The Rule Book GE/RT8000/TW1 Preparation and Movement of Trains General Section 2 Classification and speed of trains

Second Character	Route
A	Manningtree and Harwich Town Cambridge and Harwich International Harwich District
B	London Liverpool Street, Stratford and Stansted Airport London Fenchurch Street/London Liverpool Street and Shoeburyness (via Laindon) Ipswich to Felixstowe South Terminals
C	Stratford and Gidea Park, Norwich and Great Yarmouth (via Reedham) London King's Cross and Cambridge London Liverpool Street District
D	Ipswich and Lowestoft London Liverpool Street and Cheshunt/ <del>Hertford East</del> (via Seven Sisters) (2D00-2D49) <del>London Liverpool Street and Hertford East (via Seven Sisters) (2D50-2D99)</del> London Fenchurch Street/London Liverpool Street and Shoeburyness (via Ockendon) Broxbourne District
E	To Eastern Region (LNE area) ECS to East Ham EMUD
F	Chelmsford (including Braintree branch) and Colchester; Class 1 Liverpool Street to or from Colchester Town NOT calling at Romford; Liverpool Street to or from Clacton/Walton-on-the-Naze via Colchester Town but NOT calling at Romford; also Class 2 Liverpool Street to or from Colchester Town calling at Romford or Liverpool Street to Clacton/Walton-on-the-Naze via Colchester Town and calling at Romford; Colchester to Colchester Town; Colchester to Clacton/Walton-on-the-Naze via Colchester Town London Fenchurch Street/London Liverpool Street and Shoeburyness (via Laindon, if B cannot be used) Colchester District
G	Anglia Internal Special Trains
H	London Liverpool Street and Cambridge, Cambridge North, Ely and King's Lynn Cambridge District (Main Line)
I	Richmond and Upminster LT
J	Wickford and Southminster, Norwich and Lowestoft Stansted Airport to former Midland or North West areas Barking to/from Gospel Oak
K	Billericay and Southend Victoria Norwich and Cambridge/Stansted Airport Ockendon Branch
L	To East Anglia Area Clapham Junction to Stratford via Camden Road
M	Orient Way Depot Stratford and Meridian Water via LVR To the Midlands and North West areas
N	Class 1 Liverpool Street to or from Clacton/Walton-on-the-Naze NOT via Colchester Town and NOT calling at Romford; also Class 2 Liverpool Street to Clacton/Walton-on-the-Naze NOT via Colchester Town BUT calling at Romford; Colchester to Clacton/Walton-on-the-Naze NOT via Colchester Town; Thorpe-le-Soken and Walton-on-the-Naze Stansted Airport or Norwich to Midland or North West areas Stratford, Camden Road to/from Richmond London Fenchurch Street to or from Laindon
O	To Southern Area Cheshunt and Hertford East (via Tottenham Hale) Richmond and Upminster LT
P	Norwich/Great Yarmouth (via Acle) London Liverpool Street to or from Norwich London Fenchurch Street/London Liverpool Street and Shoeburyness (via Laindon, if diagrammed as Class 387) Norwich District

Second Character	Route
Q	UTU trains only
R	Ipswich to Felixstowe Town/North Terminals. Norwich and Nottingham, Manchester Picadilly or Liverpool, Lime Street ECS trains to Letchworth CSD Fenchurch Street/Liverpool Street and Shoeburyness(via Rainham) Barking District & Felixstowe North Terminals
S	Norwich and Sheringham London Liverpool Street and Bishop's Stortford ECS to Shoeburyness. To Scotland Zone. Shunt movements Thameslink Route - Cambridge and Gatwick Airport / Three Bridges / Brighton via London Bridge and Quarry Lines
T	Colchester/Marks Tey and Sudbury London Liverpool Street and Chingford, London King's Cross and Cambridge North / Ely / King's Lynn
U	London Liverpool Street and Enfield Town; Thameslink Route - Cambridge and Maidstone East / Ashford slow via London Bridge and Swanley
V	To Great Western area; Romford and Upminster; ECS trains running to Ilford EMUD; Class 1 services between Great Yarmouth and Liverpool Street or vice versa.
W	Harold Wood, Ingatestone Cambridge and Ipswich
X	Special conditions for exceptional load
Y	Ipswich and Stowmarket EMU peak services ECS to form Class 1 trains, Willesden Junction to/from Clapham Junction Stratford, Camden Road to Clapham Junction Services to Paddington Crossrail Ipswich District (except Felixstowe Branch)
Z	Special trains

### Third and Fourth Character

For services running solely within Anglia, Down services normally carry EVEN NUMBERS and Up services normally carry ODD NUMBERS

### North London Line EA 1310 & EA 1320

London Overground services Westbound EVEN NUMBERS

London Overground services Eastbound ODD NUMBERS

### 1.3.2 Days of Operation

The following abbreviations are used to identify the day or days that a train operates.

Abbreviation	Description
M	Monday
T	Tuesday
W	Wednesday
Th	Thursday
F	Friday
S	Saturday
Su	Sunday
EWD	Every Week Day (Monday to Saturday)
Daily	Every day – will not accept this; there must be a separate entry for Sundays (Note – need to include reference to new ITPS processes)
<b>Suffixes</b>	
O	Adding this indicates that the train will run only on that day or those days shown
X	Adding this indicates that the train will not run on that day or those days shown
<b>General</b>	
BHX	Denotes that this train does not run on a bank holiday

### 1.3.3 Traction and Rolling Stock

Abbreviation	Description
22X	DMU classes 220/221/222
BMU	Any bi-mode diesel & electric multiple unit
DBSO	A vehicle at one end of a train formed of a locomotive, a set of either Mk II or III vehicles and the Driving Brake Second Open which accommodates a train driver and also passenger accommodation
DVT	Driving Van Trailer – accommodates a train driver and/or conductor only with a set of controls replicated from a locomotive at the opposite end of a set of coaching stock
DMU	Any diesel multiple unit (excluding classes 220/221/222)
EMU	Any electric multiple unit
ECS	Empty Coaching Stock includes empty diesel and electric multiple units
HST	Trains consisting of two Class 43 locomotives and Mk 3 passenger vehicles
LH	A passenger or parcels train hauled or propelled by one or more locomotives
LHCV	Locomotive hauled coaching vehicles
Power	Passenger stock equipped with power operated external doors

### 1.3.4 Line Codes

Abbreviation	Description
-	Default linecode as indicated in Section 2.1
1UM	Up Main from Cambridge via Platform 1
1UX	Up Main from Cambridge via Platform 1 and non-preferred route (1052 points)
AL	Arrival/Airport Line
BL	Bow Line (Bow Junction and Stratford)
C	Line C
CL	Cambridge Line
CR	Up and Down Clacton
CS	Clacton Single
D	Line D
D&UGL	Down & Up Goods Line
D&UPL	Down & Up Passenger Line
DA	Up and Down Avoiding
DBL	Down Bi directional Line
DCH	Up Trains on Down Channelsea
DCL	Down Connecting Line
DED	Down Enfield Direction (reference to reversal point at Enfield Town. See 2.1)
DEL	Down Electric Line
DG	Down Goods
DGL	Down Goods Line
DGL(N)	Down Goods Line North
DL	Down Line / Down Lowestoft
DM	Down Main
DMG	Down Main then Down Goods Loop
DML	Down Main Line
DMT	Down Main then Through Line
DNL	Down North London
DPL	Down Passenger Loop / Line
DS	Down Slow
DST	Down Slow then Through Line
DTL	Down Temple Mills Line
DUG	Down & Up Goods
DUL	Down & Up Lowestoft
DX	Down Connecting (East Ham to Barking)
DX1	Down trains Bow Junction running ML to UBL via points 2128R
DX2	Down trains Bow Junction running ML to UBL via points 2133R
DX3	Down trains Bow Junction running via points 2134R
DX4	Down trains Bow Junction running ML to BL via points 2128R and 2134R
E	Line E
EL	Electric Line
EMM	Electric, Main, Main
ESF	Electric, Suburban Fast
FL	Fast Line
FMS	Fast, Main, Suburban
FS	Down & Up Felixstowe Single
FSE	Fast, Suburban, Electric
FSM	Fast, Suburban, Main
GL	Goods Line
IE	Independent Electric (Ilford)
IL	Independent Line (Ilford) in Up direction only via Signal L336
LS	Long Siding
LVR	Lea Valley Reversible
MEM	Main, Electric, Main

Abbreviation	Description
ML	Main Lines
ML1	Main Line departing Liverpool Street Platforms 5-9 via points 2008/2009
ML2	Main Line departing Liverpool Street Platforms 5-9 via points 2014/2015
MME	Main, Main, Electric
MSF	Main Suburban, Fast
NL	Down North London
PL	Platform Line
REV	Reversible
RM	Reversible (Temple Mills E Junction and Channelsea Junction)
RL	Down North London Relief
RVL	Reversible
S	Suburban Line
S1	S line from Bethnal Green running via points 2014/2015 to Liverpool Street Platforms 5-9
S2	S line from Bethnal Green running via points 2008/2009 to Liverpool Street Platforms 5-9
SEM	Via signals 71,95 and 221
SL	Slow Line
SMF	Via signals 71,93 and 103
TL	Down & Up Trimley Loop Through Line
TLG	Through Line then Down Goods Loop
UBL	Up Bow Line
UCL	Up Connecting Line
UEL	Up Electric Line
UG	Up Goods
UGL	Up Goods Line
UL	Up Line / Up Lowestoft
UM	Up Main
UM4	Up Main then via Platform 4
UML	Up Main Line
UMT	Up Main then Through Line
UNL	Up North London
UPL	Up Passenger Loop
UX	Up trains to Cambridge running DM from 1093 or 1092 points Up Main from Cambridge via non-preferred route (1052 points)
UX1	Up Trains from Stratford running BL to DML via points 2128R
UX2	Up trains from Stratford running BL to DML via points 2133R
UX3	Up trains from Stratford running DBL to BL via points 2134R
UX4	Up trains from Stratford running DBL to DML via points 2134R/2128R
UXL	SEE XUL
W	Line W
XL	Trains via points 2156R
XDL	Trains via points 2153R/2159R .
XUL	Up trains from Bow Junction to Up ML via points 2120R

### 1.3.5 Activity and Other Codes

Abbreviation	Description
*	Suppression of traffic stop indicator
-D	Train stops to detach vehicles
-T	Train stops to attach and detach vehicles
-U	Train stops to attach vehicles
A	Train stops or shunts for other trains ahead or to pass only. Shows as an * in WTT
AE	Trains stops to attach/detach assisting locomotive.
BL	Train stops to attach or detach a banking locomotive
C	Train stops to change train crew
D	Train only stops to set down passengers. Shows as an s in NRT
E	Train stops for examination
G	NRT data to add
H	Notional Activity to prevent WTT column merge
HH	As H, where there is a third column involved
K	Passenger count point
KC	Ticket collection and examination point
KE	Ticket examination point
KF	Ticket examination point – 1 <sup>st</sup> Class only
KS	Selective ticket examination point
L	Train stops to change locomotives
N	Stop not advertised to the public
OP	Train stops for other operating reasons
OR	Train locomotive on rear of train
PR	Train propelling between points shown
R	Train stops when required. Shows as an x in NRT
RETB	Radio Electronic Token Block
RM	Trains stops for a reversing movement or driver to change ends
RR	Train stops to allow the locomotive to run-round its train
S	Trains for railway personnel only
T	Trains stops to pick up or set down passengers
TB	Train begins (Origin)
TF	Train finishes (Destination)
TS	Detail consist for TOPS Direct requested by freight operators.
TW	Train stops to pick up or set down a staff, tablet or token on Single Lines. See Section 5.2
U	Train only stops to pick up passengers. Shows as a u in NRT
W	Train stops for watering of coaches
X	Train passes another train at crossing point on single line. See Section 5.2
x{	Suppress running line information
{	Force running line indication
{}	Force path and line indications
}	Force path indication
#	Force stop with TW

### Activity Codes – Notes

1. Any passenger train that stops at a location automatically generates a T Activity unless it is suppressed.
2. If an activity is required that removes the 'passenger stop' activity (T, D, U and R) from TPS, then the 'passenger stop' activity must always appear in the first activity field (e.g. T -D would be correct, -D T would not). This is because the National Rail Timetable (NRT) extract program only considers the first activity field. If it does not find a 'passenger stop' activity in the first field the time will not be extracted to appear in the NRT.
3. Up to 6 activities may be shown for each event.
4. No two activities may be duplicated at the same event.
5. At any one event, the following groups are mutually exclusive:
  - a) D, U, T, N, S, TW, OP.
  - b) -D, -U, -T.
  - c) TB, TF.
  - d) KC, KE.
6. N, R, G, D and U are only valid with Train Categories XC, XD, XI, XX, XZ, OO, OW, OL, BS, BR and blank (i.e. 'advertised' services).
7. K, KC, KE, KF, KS are only valid with Train Categories starting X or O.
8. If TF is present then none of K, KC, KE, KF, KS can be present.
9. Activity T indicates that a train stops to pick up and set down. This normally refers to passengers. Activity -T indicates that the train stops to attach and detach vehicles. At any location where a 'stop' time is shown, TPS or a similar system will assume a default activity is required unless otherwise specified. These default activities are as follows: T for trains with a Train Category starting in X or O, OP for trains with a Train Category starting in Z or E, and -T for all other trains (but see below). The default activity will be generated when the upload file is created.
10. If activities U, D, N, R, OP, S, TW, -U or -D are specified then this overrides the defaults and only the specified activities will be included in the upload file (it is not necessary to use the \* suppression code if these codes are present).
11. If a traffic activity is NOT required at a 'stop' location with activities other than U, D, N, R, OP, S, TW, -U or -D (e.g. at 'C' or 'L' stops) then the \* must be input to the TPS or similar system train specification at that location to suppress -T or T. If the \* is not added to indicate a non-traffic stop then T, -T or OP will be added to the upload file.
12. If an activity -T (only) is required on a train with a Category starting in X or O it is necessary to add a \* to the TPS spec (to suppress 'T') and positively show -T in the activity column.

## 2 Route Description

### 2.1 Planning Geography

Network Rail maintains the planning geography and issues it to Train Operators using the BPlan system. BPlan data is to be regarded as the master geography and it is the responsibility of Train Operators and nominated Network Rail users to ensure that data in their train planning systems reflects the master geography.

It is essential that all locations, times and full details such as platforms, running lines, activities, etc. comply fully with all of the following rules. Any Network Links used for buses only are to have running line defined as BUS. All data used by a specifier must be that supplied by Network Rail: use of estimated times added or amended locally will cause the trains concerned to fail validation.

In order to avoid the creation of unnecessary journey legs and associated point-to-point timings, all passing times must conform to these rules.

Locations in bold **type and underlined** are mandatory timing points i.e. apply to all trains on the specified line of route.

Locations in **bold** type are conditional timing points with a mandatory element. These are locations where all trains travelling on a specific line or in a specific direction are required to be timed at this location, which will be defined in the Notes column. For lines/directions for which the mandatory element does not apply they are to be treated as non-mandatory timing points and are only required to be shown in connection with a specific activity with one or more of the codes shown below in the Code column.

Locations in normal type are non-mandatory timing points and are required to be shown only for a specific activity with one or more of the codes shown below in the Code column.

Locations in *italic* type are not timing points but are shown for reference purposes.

Line references shown in italics e.g. *SW100* are only for reference purposes.

In the tables below, the following codes apply:

- |   |  |
|---|--|
| F | Only freight trains are timed here                                   |
| P | Only passenger trains are timed here                                 |
| S | Only stopping trains are timed here                                  |
| X | Only trains crossing from one running line to another are timed here |

<b>EA 1010 LIVERPOOL STREET TO SEVEN KINGS</b>

Wymondham Lane (Up Sidings)		-	F	
<b>CO877 Signal</b>	-			Down trains only
<b>CO878 Signal</b>		-		Up trains only
Trowse GPL CO1749	-		S	Timing point to be used for reversal moves
<b>Trowse Junction</b>	-	-		To/from Norwich – EA1013

## EA 1744 BOSS HALL JUNCTION TO EUROPA JUNCTION - BACON FACTORY CURVE

TIMING POINT	DOWN	UP	CODE	NOTES
<b><u>Boss Hall Junction</u></b>	-	-		<i>To/from Oulton Broad North – EA1430.</i> TIPLOC - IPSWBHJ
Ipswich Signal CO351	-		S	TIPLOC – IPSW351 All trains on the Down Chord which dwell for pathing time to be shown with Arr/Dep times
Ipswich Signal CO352		-	S	TIPLOC – IPSW352 All trains on the Up Chord which dwell for pathing time to be shown with Arr/Dep times
<b><u>Europa Junction</u></b>	-	-		<i>To/from Trowse Junction – EA1012.</i> TIPLOC – IPSWEPJ

## 2.2 Route Opening Hours

Subject to constraints imposed by the Engineering Access Statement all routes are open continuously, except as shown below. The hours shown reflect the contractual opening hours. The actual opening hours may vary from those shown.

For a complete listing of current signal box opening hours please refer to the 'Compendium of Signal Box Opening Hours' which can be found on the Network Rail website - <https://www.networkrail.co.uk/industry-commercial-partners/information-operating-companies/>. If there is doubt about a signalbox's opening hours check with the appropriate Network Rail Operations Manager.

When the routes shown are required for services diverted under the Engineering Access Statement, opening hours will be increased as necessary on a temporary basis.

Signal boxes equipped to be switched-out during a route's opening hours are shown within the routes concerned.

PLT denotes passage of last train.

<b>EA 1360 DUDDING HILL JUNCTION TO ACTON WELLS JUNCTION</b>			
<b>ROUTE SECTION</b>	<b>SX</b>	<b>SO</b>	<b>SUN</b>
Dudding Hill Junction to Acton Wells Junction	Continuous	Continuous	00.00 – 07.00 and 22.00 to 24.00
<b>SIGNAL BOX WHICH CAN BE SWITCHED OUT</b>			
Neasden Junction *	05.00 – 21.00	05.00 – 13.00	Closed
* Equipped to be switched out but when Neasden Junction SB is closed the route between Neasden Junction and Neasden South Junction is closed			

## 3 Electrification

### 3.1 Electrification Supply Restrictions

Under normal conditions, the electrification power supplies will not place any restrictions on the use of approved electric traction. However, the Route Clearance sections of the Sectional Appendix to the Working Timetables, issued by, Network Rail do tabulate restrictions on the movement of electric trains. Refer to Table A and select Route Clearance.

Under maintenance conditions, certain sections of the electrified network may be blocked to electric traction. These restrictions are contained within the Network Rail Engineering Access Statement for the appropriate year. Additional restrictions may also arise in connection with engineering possessions requested through the Engineering Access Statement amendment procedure.

Each section of the electrified network has a finite electrical power supply capability. Intensive use over some sections of route may result in the system being overloaded. In the event of out-of-course running it may be necessary to regulate electric traction train paths to facilitate reliable traction power availability

The following restrictions are currently in force as Local Instructions in the Sectional Appendix:

<b>EA 1370 GOSPEL OAK TO BARKING TILBURY LINE JUNCTION WEST</b>
Due to the capacity of the current feeding arrangement in the Barking area, no more than two electric freight trains per hour can pass through Barking between 0600 – 1000 each day.
This restriction does not affect the running of electric passenger services or non-electric freight.
<i>Please note that this restriction refers to a combined total and is not direction dependent.</i>

<b>EA 1380 FENCHURCH STREET TO SHOEBURYNESSE</b>
Due to the capacity of the current feeding arrangement in the Barking area, no more than two electric freight trains per hour can pass through Barking between 0600 – 1000 each day.
This restriction does not affect the running of electric passenger services or non-electric freight.
<i>Please note that this restriction refers to a combined total and is not direction dependent.</i>

## 4 Rolling Stock Restrictions

### 4.1 Locomotive Route Availability

The route availability of Locomotives is contained in the Sectional Appendix to the Working Timetable. It can be accessed by line of route then using the 'Route Clearance' tab. The following tables are shown

Table D4A – Route Clearance of Diesel Locomotives Classes 8 to 47/0,2 & 3  
Table D4B - Route Clearance of Diesel Locomotives Classes 47/4 to 70 and MPV  
Table 4C - Route Clearance of Electric Locomotives

### 4.2 Passenger Stock Restrictions

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables, issued by Network Rail. Refer to Table A, and select Route Clearance.

### 4.3 Freight Wagon Restrictions

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables, issued by Network Rail. The Route Availability for a given location is in the 'Signalling and Remarks' column of Table A.

The route availability of Freight Containers and Swap Bodies is also contained in the Sectional Appendix to the Working Timetable.

The following table is shown

Table D5 – Route clearance of Freight Containers/Swap Bodies

Trains conveying vehicles that have a heavy axle weight or other exceptional characteristics, or vehicles conveying containers or swap bodies require an RT3973 form.

*Note: The Rule Book GERT8000 Section TW4 of defines a container as an intermodal transport unit constructed to a standard (usually specified by the ISO) suitable for conveyance by road, rail or sea.*

*Note: The Sectional Appendix does not cover the CTRL HS1. The CTRL has its own Working Manual.*

### 4.4 Freight Train Load Limits

Trailing load limits for all traction types are contained in the Freight Loads Book published by Network Rail.

*Note: It is important to understand the weight limitations that apply to trains especially over sections of heavily graded routes. Coupling strength information is also contained in the Freight Loads Book. Coupling strength is important in determining the trailing loads that trains can convey.*

### 4.5 Freight Train Length Limits

Refer to the Freight Train Loads Book published by Network Rail for the length limits of freight trains and also to Section 5.3 of this publication.

*Note: The Sectional Appendix quotes loop lengths in metres and feet. These are the absolute lengths of the loop from the signal at the outlet to the fouling point at the entrance to the loop.*

## 4.6 Engineers Trains Restrictions

Some On Track Machines (OTMs) do not reliably activate track circuits. These OTMs must use one of the following special reporting numbers 6Z09, 7Z09 or 8Z09\*. Because these OTMs do not reliably activate track circuits it is not possible to apply the headways and junction margins as outlined in the Timetable Planning Rules consistently and it is therefore not possible for Operational Planning to provide timings for these movements.

\* Source GE/RT 8000-OTM

## 4.7 Driver Only Operation Limits

Driver only operation (DOO) of passenger trains is permitted within the East Anglia Region as listed. Driver only operation of non-passenger trains – DOO (NP) – is, however, permitted on all routes.

When special trains are required to run DOO (NP) over the following routes, it must be ascertained that competent staff are available to deal with these trains at the forwarding and receiving terminals, yards, sidings etc., or where locomotive changes take place en route. Furthermore, signal boxes are to be advised of these additional DOO (NP) services, with particular reference to Empty Coaching Stock (ECS) trains.

In the table below, the following abbreviations apply:

Pass – Passenger trains with power operated sliding doors

ECS Slam – Empty Coaching Stock with slam doors

ECS Slide – Empty Coaching Stock with power operated sliding doors

NA – Not authorised

P – Permitted

# - Permitted for short notice movements when all other DOO (NP) conditions are fulfilled and all doors are locked before departure. Authorisation must be obtained from Network Rail Operations Control before this can be applied.

<b>EA 1010 LIVERPOOL STREET TO SEVEN KINGS</b>		
ROUTE SECTION	PASS	ECS SLIDE
Liverpool Street to Seven Kings	P (not 745)	P

<b>EA 1011 SEVEN KINGS TO IPSWICH</b>		
ROUTE SECTION	PASS	ECS SLIDE
Seven Kings (excl) to Colchester	P (not 745)	P

## 5 Running Times, Margins and Allowances

Except where otherwise stated, the information in this section of the Timetable Planning Rules reflects the general rules used in developing the 1994/5 timetable (Several exceptions to the general rules were agreed for 1994/5 and exceptions may continue to be possible with the specific agreement of Network Rail in every case).

### 5.1 Sectional Running Times

The definition for Sectional Running Times (SRTs) is listed in Section 6.4 of the National TPRs.

#### 5.1.1 Source of Current SRTs

The definitive catalogue of SRTs is BPlan.

#### 5.1.2 Method of Calculation

SRTs are revised by Train Operators and Network Rail as part of the Revision of Timetable Planning Rules process outlined in Network Code Part D 2.2. Normally they will not change from one timetable to the next. Network Rail will, however, re-calculate SRTs for particular train/route combinations in the following circumstances:

- i) Where a Train Operator anticipates using a train/route combination for which no suitable SRTs exist;
- ii) Where Network Rail anticipates a change to route data, e.g. line speed changes;
- iii) Where there is evidence that the SRTs in current use do not adequately represent real train performance;
- iv) Where it is cost-effective to re-calculate all SRTs on a route at the same time as a re-calculation for a particular train type.

Network Rail will reflect the methodology and assumptions described in Section 6 of the National TPRs when calculating TPR proposals, unless and to the extent documented otherwise in respect of any given proposal. Timetable participants are encouraged to submit change proposals for review and consultation in line with the national methodology, or in line with such alternative methodology and assumptions as favoured by the proposer. NR will not seek to reject any proposal on the exclusive basis of the methodology employed, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

SRT change proposals may be calculated in a number of ways including, but not limited to:

- a) Through actual timing of trains
- b) Use of On Train Monitoring Recorder (OTMR) systems
- c) Use of computer system actual values
- d) Use of computer simulation tools
- e) By any other agreed methodology

It is permissible to include percentage uplift in SRTs instead of applying engineering recovery allowances to be agreed by all affected parties.

A 5% allowance is included in the calculation of Class 345 SRTs to take account of the lack of explicit engineering allowances in Timetable Planning Rules.

In the event that the application of different methodologies produces conflicting proposals, a joint observation exercise should be undertaken to ascertain what happens in reality.

### 5.1.3 New and Revised Sectional Running Times

New and revised SRTs are revised by Train Operators and Network Rail on an individual basis. These should be supplied by applying the methodology described in Section 6 of the National TPRs unless another methodology is deemed appropriate, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

### 5.1.4 Timing of Trains Consisting of Passenger Vehicles on Goods Lines

The sectional running timings quoted for trains consisting of passenger vehicles on Goods Lines reflect the speeds shown in the relevant Table 'A' of the appropriate Sectional Appendix. They do not constitute an authority to time trains conveying passengers on a Goods Lines. Nor do they reflect the permitted speeds at which a train conveying passengers can proceed. Network Rail will offer the sectional running times for trains conveying passengers on a Goods Line on a train-by-train basis. For those times please apply to the Operational Planning Department.

Operations Publications publish the authority to allow the planned operation of trains conveying passengers on Goods Lines. Before Operations Publications can grant authority they require confirmation that the track is fit for purpose and that there is a safe method of operation. Therefore, the Operational Planning Department must apply to the relevant Track Engineer and Operations Manager for confirmation of these requirements in writing. The Operational Planning Department must pass these responses to Operations Publications. The Operational Planning Department is responsible for advising Operations Publications of the requirement to operate a passenger train on a Goods Line at least 8 weeks before the day of operation.

## 5.2 Headways

The definition for Headways is listed in Section 6.5 of the National TPRs.

### 5.2.1 Headway Values

All times are in minutes. All routes are shown.

Where track circuit block (TCB) signalling applies, the standard headways for each route are shown, together with any exceptions.

AB indicates locations where absolute block signalling applies: here the headway is to be calculated from the transit time of the first of each pair of trains running between the consecutive block posts being considered. To this transit time shall be added 2 minutes to allow for the signaller's actions. Exceptions are shown as AB and appear together with the actual headway value to be used, which includes the allowance for signallers' actions. Where there is an intermediate block signal, the absolute block section concerned shall be between this signal and the next block post in advance.

Single lines and other forms of signalling are shown, together with any values applicable, where they occur.

"OTNS" or "OT" indicates One Train Working with No Train Staff; "OTS" or "OT(S)" indicates one train working with Train Staff. "NST" indicates No Signaller token. In these cases only one train is allowed in the section at one time; a second train cannot be allowed to enter the section until the first train has left the section.

"ETB" indicates Electric Token Block and "TB" indicates Tokenless Block for single lines.

"RB" indicates Radio Signalling where "long section tokens" can be issued between certain block posts during times of low traffic volume.

Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.

Headways in Anglia are applied on depart to arrive methodology.

<b>EA 1010 LIVERPOOL STREET TO SEVEN KINGS</b>			
<b>TIMING POINTS INCLUDED</b>	<b>DOWN</b>	<b>UP</b>	<b>NOTES</b>
Liverpool Street to Stratford	2	2	
Stratford to Forest Gate Junction	2*	2*	*3 following freight

Whitlingham Junction to Wroxham	11	11	
Wroxham to North Walsham	12		Single line. No intermediate signal in Down direction
North Walsham to Worstead		5	Single line. Intermediate block signal headway for following moves in up direction
Worstead to Wroxham		7	Single line. Intermediate block signal headway for following moves in up direction
North Walsham to Gunton	7	7	Single line. Intermediate signal
Gunton to Cromer	10	10	Single line. Intermediate signal

### EA 1490 CROMER TO SHERINGHAM

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Cromer to Sheringham			Single line. One train in Section

### EA 1500 BRUNDALL JUNCTION TO YARMOUTH

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Brundall Junction to Acle			Single line. One train in Section
Acle to Yarmouth			Single line. One train in Section

### EA 1510 REEDHAM JUNCTION TO YARMOUTH

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Reedham Junction to Yarmouth			Single line. One train in Section

### EA 1520 SAXMUNDHAM TO SIZEWELL

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Saxmundham Junction to Sizewell			Single line. One train in Section

### EA 1530 COLDHAM LANE JUNCTION TO HAUGHLEY JUNCTION

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Coldham Lane Junction to Dullingham			Single line. One train in Section
Dullingham to Chippenham Junction			Single line. One train in Section
Chippenham Junction to Kennett	*	*	*One train in Section
Kennett to Bury St Edmunds	7	8	
Bury St Edmunds to Haughley Junction	6	6	

### EA 1540 CHIPPENHAM JUNCTION TO ELY DOCK JUNCTION

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Chippenham Junction to Soham	8	8	
Soham to Ely Dock Junction			Single line. One train in Section

### EA 1550 ELY NORTH JUNCTION TO ELY WEST JUNCTION (ELY WEST CURVE)

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Ely North Junction to Ely West Junction			Single line. One train in Section

### EA 1560 ELY NORTH JUNCTION TO KINGS DYKE (INCLUSIVE)

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Ely North Junction to Kings Dyke	4	4	

### EA 1570 MARCH EAST & WEST JUNCTIONS TO WISBECH

TIMING POINTS INCLUDED	DOWN	UP	NOTES
March East Junction to Whitemoor Junction			Single line. One train in Section
March West Junction to Whitemoor Junction			Single line. One train in Section
Whitemoor Junction to Wisbech			Single line. One train in Section

### EA 1580 ELY NORTH JUNCTION TO TROWSE JUNCTION

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Ely North Junction (excl) to Shippea Hill	*	*	* TCB timed as AB + 2 minutes (one train in section)
Shippea Hill to Lakenheath	*	*	* TCB timed as AB + 2 minutes (one train in section)
Lakenheath to Brandon	*	*	* TCB timed as AB + 2 minutes (one train in section)
Brandon to Thetford	*	*	* TCB timed as AB + 2 minutes (one train in section)
Thetford to Harling Road	*	*	* TCB timed as AB + 2 minutes (one train in section)
Harling Road to Eccles Road	*	*	* TCB timed as AB + 2 minutes (one train in section)
Eccles Road to Attleborough	*	*	* TCB timed as AB + 2 minutes (one train in section)
Attleborough to Spooner Row	*	*	* TCB timed as AB + 2 minutes (one train in section)
Spooner Row to Wymondham	*	*	* TCB timed as AB + 2 minutes (one train in section)
Wymondham to CO877/ CO878 Signal	4 ½ 5 ½	4 5 ½	Following non-stop passenger Following freight or stopping passenger
CO877/CO878Signal to Trowse Junction (excl)	6 7	5 6	Following passenger Following freight

## EA 1744 BOSS HALL JUNCTION TO EUROPA JUNCTION- BACON FACTORY CURVE

TIMING POINTS INCLUDED	DOWN	UP	NOTES
Boss Hall Junction to Europa Junction	*	*	* One train in Section

### 5.2.2 General Capacity Constraints

Where single line working is to operate or trains are to be routed to run on a line other than that normally planned for them, constraints on capacity will apply – see Engineering Access Statement.

### 5.3 Junction Margins and Station Planning Rules

The definition for Junction Margins and Station Planning Rules is listed in Section 6.6 - 6.10 of the National TPRs.

All times shown are in minutes. Where adjustments to sectional running times are shown, the value must be added to the normal SRTs shown in B Plan. Negative adjustments are specially identified.

Minimum station allowances are the minimum practical for the particular type of stock. These are shown with exceptions being listed by line of route where applicable.

Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.

STANDARD VALUES – MINIMUM		
Adjustments to Sectional Running Times		
Movements	Reason	Value
Terminating trains arriving on half minutes in final timing link (including those being 'called on' to attach) (with the exception of ARL & London Underground services)	Station working	{½}
Midnight Timings adjustment	We cannot publish midnight times	{-½} or {-1} at midnight TIPLOC, { ½} or {1} at next TIPLOC
Attaching/Detaching Minimum Allowance	4 or as specific TOC traincrew agreement	
Attachment of units – for services to/from King's Cross		
Class 365/387 units	6	
Detachment of units – for services to/from King's Cross		
Class 365/387 units	5	
Connectional Allowance	5	
Dwell Time		
Multiple Units	½	
Loco Hauled	1	
All - passenger to ECS with no change of direction	1	
Dwell time values apply only to Class 1, 2 and 9 passenger trains		

<b>STANDARD VALUES – MINIMUM</b>		
<b>Generic Rolling Stock Classes</b>		
<b>Train Class</b>	<b>ITPS Timing Load</b>	<b>TPR values</b>
<b>Class 387</b>	<b>365 timing load</b>	<b>Class 387 values</b>
<b>Junction Margin</b>		
Standard value	2	
Arrival followed by a conflicting departure from a station	1	
<b>Minimum Turnarounds</b>		
up to 4 car EMU/DMU	4 or as specific TOC traincrew agreement	
up to 8 car EMU/DMU	6 or as specific TOC traincrew agreement	
up to 12 car EMU/DMU	7 or as specific TOC traincrew agreement	
Class 710 x 4 car	5	
Class 378 or 710 x 5 car	6 minutes (5 minutes when forming an ECS)	
Class 710 x 8 car	7	
Class 378 or 710 x 9/10/12 car	8	
DVT Passenger to ECS	15	
DVT ECS to Passenger	20	
DVT Passenger to Passenger	20	
GA Class 720 x 5 car	4 5	
GA Class 720 x 10 car	7	
GA Class 745 x 12 car	7	
GA Class 755 x 3/4 car	4	
GTR Class 700 x 8 car	8	
GTR Class 700 x 12 car	10	
GTR Class 387 x 12 car	10	
GTR Class 387 x 8 car	9	
GTR Class 387 x 4 car	8	
GTR Class 365 x 12 car	7	
GTR Class 365 x 8 car	6	
GTR Class 365 x 4 car	5	
GTR Thameslink services to/from south of London Blackfriars	10	
GTR 6 car class 717	6	
Class 345 7 car	6	
Class 345 9 car	7	
Reversal of light loco (light engine)	2	
Locomotive run round	20	
The above minimum values may be reduced with operator consent if additional resources, such as a second driver, are provided.		
<b>Platform Re-occupation</b>		
Minimum time allowed between one train departing and another arriving in the same platform at terminal stations		3
<b>Setting back (where permitted)</b>	2	
<b>Single Line Reoccupation</b>	3	
All allowances mentioned in the exceptions should be included in train times when approaching the listed timing point unless otherwise noted.		
<b>Peak services</b>		
Peak is defined as services arriving at London Kings Cross, St Pancras International, London Fenchurch Street,		

<b>STANDARD VALUES – MINIMUM</b>
London Liverpool Street (High Level) & Tottenham Court Road between 0700 and 0959 SX and departing London Kings Cross, St Pancras International, London Fenchurch Street, London Liverpool Street (High Level) & Tottenham Court Road between 1600 and 1859 SX.
For all stations on EA 1310, EA 1320 and EA 1370, the AM peak is defined as services calling at that station between 0700 and 0900 SX and the PM peak between 1630 and 1900 SX.

**THE FOLLOWING INFORMATION SHOWS THE EXCEPTIONS TO THESE STANDARD VALUES**

<b>EA 1010 LIVERPOOL STREET TO SEVEN KINGS</b>		
<b>Liverpool Street</b>		
<b>Advertised Time changes</b>		
All arrivals between 07.00 and 09.59 (SX) to be advertised to arrive 2 minutes later than WTT time. (This does not apply to London Overground services or Norwich Class 9 services)		
MTR Crossrail trains which depart from Liverpool Street between 16.00 and 18.59 (SX) are to be advertised to arrive at destination 2 minutes later than WTT.		
<b>Connectional Allowance</b>	15	
<b>Minimum Turnrounds</b>	5	4-car EMU/DMU turnround passenger to ECS
	7	3 to 9-car EMU/DMU/BMU turnround passenger to passenger
	9	10/12-car EMU/DMU turnround passenger to passenger 10-car 720 turnround 12-car 745 turnround except as below
	10	12-car 745 turnround Norwich IC passenger to ECS
	15	12-car 745 turnround ECS to Norwich IC passenger
	20	12-car 745 turnround Norwich IC passenger to Norwich IC passenger
	6	4/8-car 357 turnround
<b>Platform reoccupation</b> A platform reoccupation matrix is shown below		
<b>Departure after conflicting arrival</b>	1	Applies if either train is formed of 10 to 12 coaches
<b>Splitting and coupling of trains permitted</b>	In all platforms for class 1, 2, 3, ECS 5, 9 & 0	
	Class 720 5-car EMUs are not permitted to attach to or run on top of another Class 720 5-car EMU at Liverpool Street. This is owing to the position of the track circuits and track circuit signalling restrictions.	
<b>Platforming Restrictions</b>	<p>Class 710s – the following maximum capacity applies: Platforms: 1, 2, 7 &amp; 8 - 8 car units in length Platforms: 17 &amp; 18 - 4 car units in length</p> <p>Platforms 1, 2, 7 &amp; 8: An 8 car Class 710 cannot be accommodated in the platform with any other 4 car unit in any order.</p> <p>Platforms 17 &amp; 18: A 4 car Class 710 cannot be accommodated in the platform with any other unit of any length or class.</p>	

<b>Liverpool Street Platform Reoccupation Matrix</b>
<b>Notes for the Platform Reoccupation Matrix</b>
* = Trains can only access the Down Suburban Line from Platform 10 if both Platforms 9 and 10 are not

## Liverpool Street Platform Reoccupation Matrix

### Notes for the Platform Reoccupation Matrix

occupied by more than 8 cars.

P = Parallel/Non Conflicting.

T = Minimum turnround time values apply.

0 = Minimum of 0 minutes to be allowed between 1st move and 2nd move.

0-1 = Where possible a minimum of 1 minute to be allowed between 1st move and 2nd move (0 minutes can be used if the arrival is formed of 8 cars or less and is not arriving into an occupied platform).

2 = Minimum of 2 minutes to be allowed between 1st move and 2nd move.

3 = Minimum of 3 minutes to be allowed between 1st move and 2nd move.

4 = Minimum of 4 minutes to be allowed between 1st move and 2nd move.

c = Value of 5 minutes to apply if 2nd move is a passenger service.

x = Only a parallel move if there are not more than two moves taking place at one time between Platforms 5-10 (Arr+Dep).

The Linecodes shown below also appear in Section 2.1 of this document.

ML1 = Down ML trains running via 2008/2009 points.

ML2 = Down ML trains running via 2014/2015 points.

S1 = Up S trains running via 2014/2015 points.

S2 = Up S trains running via 2008/2009 points.

Stratford		
Adjustments to sectional running times		
Movement	Reason	Value
For freight from Woodgrange Park via UEL and Maryland East Crossovers into P10	Acceleration allowance after crossing from slow speed branch line, approach control at L330, and slow speed crossover at Maryland East	{2}
For freight from Woodgrange Park via UML from Forest Gate Junction Crossovers into P10	Acceleration allowance after crossing from slow speed branch line	{1½}
For freight from Woodgrange Park via UEL and Maryland East Crossovers into P10a	Acceleration allowance after crossing from slow speed branch line and slow speed crossovers at Maryland into P10a	{3}
For freight from Woodgrange Park via UML from Forest Gate Junction Crossovers into P10a	Acceleration allowance after crossing from slow speed branch line and slow speed crossovers at Maryland into P10a	{2½}
For freight from Ilford UML crossing over at Maryland East Crossovers into P10a	Slow speed crossovers at Maryland into P10a	{2}
For freight from Ilford UML crossing to DML at Forest Gate Junction Crossovers running through P10a	Slow speed crossover at Maryland into P10a	{1½}
For freight from Ilford UEL via Maryland East Crossovers into P10	Slow speed crossover at Maryland East	{1}
For freight from Ilford UEL crossing at Forest Gate Junction and running UML into P10	Acceleration allowance	{½}
For freight from Ilford running UEL to Maryland East Crossovers and then into P10a	Slow speed crossovers at Maryland into P10a	{2}
For freight from Ilford UEL crossing at Forest Gate Junction to UML and through P10a	Allowance after crossing at Forest Gate Junction from slower speed line and slow speed crossovers at Maryland into P10	{2½}
For freight from Ilford UEL crossing at Forest Gate Junction to DML and through P10a	Slow speed crossovers at Maryland into P10a	{2}
Dwell Time	1 (Peak times only)	
	1 Class 745/755 operated services	
	1 MTR Crossrail services	
Other Restrictions		
Platform 10A - Effective length of Platform 10A is 254 metres which equates to 39 SLUs		
Stratford Signal L295- Length clear of 2151 points (includes Platform 10A) is 537 metres which equates to 83 SLUs		
Stratford Signal L295 - Length clear of Carpenter's Road North Junction (645 points) (includes Platform 10A) is 1100 metres which equates to 171 SLUs Please note a train extending past 2151 points, towards Carpenter's Road North Junction, will preclude movements to and from platforms 11 & 12 at the London end and on or off the Temple Mills Lines at Stratford.		
Length Restriction - A first train can be held at Stratford Signal L295 whilst a second train can be held in Platform 10A providing the first train is no longer than 149 metres which equates to 23 SLUs		

Stratford		
Lea Junction Signal NL1286 - Length clear of Stratford Central Jn (Down Temple Mills Line) is 707m which equates to 110 SLUs. This length does not take into account any stand back from the signal. Due to ARS specifications <b>stops must be shown at Lea Jn (TIPLOC – LEAJ), ARS will then hold the train at Signal NL1286.</b>

## EA 1012 IPSWICH TO TROWSE JUNCTION

### Ipswich Yard

#### Allowances for Conflicting Movements

First Movement	Second Movement	Margin
Train arrives at North End of the reception	Train arrives at or departs from South end of the reception	3
Train arrives at South End of the reception	Train arrives at or departs from North end of the reception	3

#### Ipswich Yard Capacity

The capacity is controlled by the Ipswich Yard Plan

Note: only the Up and Down Goods Line and No 1 Reception Road are accessible to trains approaching via/ departing towards Stowmarket.

Note: for trains to/from Westerfield only No 2 – 4 Reception Roads are accessible directly from/to the Up East Suffolk Line, trains using the Up and Down Goods Line and No 1 Reception Road must travel via East Suffolk Junction.

#### Length Limits

The table below shows the distance from the signal at one exit to the signal at the other exit from the loop/siding. These lengths do NOT take into account defensive driving policy / stand-back from signals / space required for run-round moves.

Line	Signal From	Signal To	Length
Up and Down Goods Line	CO322	CO337	87 SLUs / 562m
No 1 Reception	GPL 812	CO341	111 SLUs / 712m
No 2 Reception	GPL 814	CO827	125 SLUs / 801m
No 3 Reception	GPL 816	CO829	108 SLUs / 696m
No 4 Reception	GPL 818	CO825	69 SLUs / 444m

### East Suffolk Junction

#### Adjustments to Sectional Running Times

Movement	Timing Load	Reason	Allowance
All trains which have departed from Ipswich SS or travelled via the Down & Up Goods line	Freight trains up to 1800t/TR100 inclusive	Speed Differential	1½ approaching Europa Junction
	Freight trains over 1800t/TR100 (exclusive)	Speed Differential	1 approaching Europa Junction

#### Adjustments to Sectional Running Times for timing loads shown in the Up Direction between Stowmarket and Ipswich East Suffolk Junction for trains which will be travelling to Ipswich SS or via DUL

Movement	Reason	Allowance
Up Freight Trains	Speed differential	1½

#### Junction Margin

<b>Cambridge Platform Working Matrix See below</b>		

## Cambridge Platform Working Matrix For Platforms 1 to 8

### Departures after arrivals

When the moves are conflicting at least one minute should be allowed.

Example: arrive Platform 1 10.06; depart Platform 3 10.07 or later.

*Exception when arrival is in Platform 4 from the South, when departures can be at the same time as the arrival.*

### Arrivals after departures

When the moves are conflicting at least three minutes should be allowed. This also applies for **reoccupation** of the same platform

Example: depart Platform 3 10.27, arrive Platform 2 10.30 or later

Freight train passes towards Gun Lane Junction	Conflicting Down train departs from signal FW9029 or FW9031	2
Freight train passes from Felixstowe Beach Junction	Freight train passes to Felixstowe Beach Junction from TL	3½

## Trimley

### Restriction

There are no down direction signals at Trimley station. This means that:

- Down trains which require to be regulated require a stop at Trimley signal FW9029 (FS) or Trimley signal FW9031 (TL).
- A Down train cannot be routed into Trimley station if an Up train has passed Felixstowe Beach Junction towards Trimley, even if the Up train is routed TL at Trimley.

At Trimley the up direction signal is located before the platform. This means that:

- An Up train cannot be routed into Trimley station if there is another train in the Trimley to Gun Lane Junction section on the FS.

## 5.4 Platform Lengths

The table below shows the maximum length of train that may use each of the platforms at the following passenger stations. All lengths are in metres. The quoted lengths are the usable lengths from ramp to ramp unless specified. The measurements take no account of the need for signal sighting. Passenger Trains longer than the quoted lengths will only be accepted subject to the authority of the Route Director.

	Platform	Effective Length	Notes
Acle	Down	118	(86 in use)

## 5.5 Timing Allowances

All allowances shown are in minutes.

Allowances apply at all times except where stated

All allowances are indicative for the Final Principle Rules and are subject to change.

No engineering allowance is to be added to Class 345s as a 5% allowance is included in the calculation of the SRTs.

E refers to engineering allowances

P refers to performance allowances

<b>EA 1010 LIVERPOOL STREET TO SEVEN KINGS</b>					
<b>Up</b>					Remarks
Approaching Bow Jn	E		1		EL trains. ( 2 for trains which run ML to Ilford/Stratford then EL)
Approaching Bow Jn	E		1		ML trains
Approaching Stratford	E		1		ML trains towards Bow Jn
Approaching Bow Jn or Channelsea Jn	E		1		For 'weaves' To be added to all schedules when trains are timed over a two-track railway (i.e. EL timings) See Engineering Access Statement for detailed timings
<b>Up (Sundays only)</b>					
Approaching Bow Jn	E		2		See Engineering Access Statement for detailed timings. The required allowance should be shown as adjustment time at individual TIPLOCs to account for the increase in running time when diverted to run EL.

<b>EA 1011 SEVEN KINGS TO IPSWICH</b>					
<b>Down</b>					Remarks
Approaching Gidea Park	E		1		EL trains
Approaching Shenfield	E		1		EL trains
Approaching Shenfield	E		1		ML trains
Approaching Shenfield London End Junction	E		1		Applies only to ML trains running to Platforms 5/6 at Shenfield and also Platform 4 if using 2250 points
Approaching Shenfield	E		1		For 'weaves' To be added to all schedules when trains are timed over a two-track railway (i.e. EL timings) See Engineering Access Statement for detailed timings
Approaching Witham	E		1		
Approaching Colchester	E		1		2 minutes applies to terminating services
Approaching Colchester	E		6		Bi-directional working. See Engineering Access Statement for detailed timings
Approaching Halifax Jn	E		1		2 minutes applies to services terminating at Ipswich
<b>Down (Sundays only)</b>					
Approaching Shenfield	E		*		* For trains timed to run ML. See Engineering Access Statement for detailed timings. The required allowance should be shown as adjustment time at individual TIPLOCs to account for the increase in running time when diverted to run EL.

EA 1011 SEVEN KINGS TO IPSWICH					
Up					Remarks
Approaching Colchester	E		1		
Approaching Witham	E		1		
Approaching Shenfield	E		1		
Approaching Shenfield	E		6		Bi-directional working. See Engineering Access Statement for detailed timings
Approaching Gidea Park	E		1		EL trains
Approaching Gidea Park	P		1		All ML trains arriving at Liverpool Street between 07:00 and 09:59 (SX except Bank Holidays)

EA 1012 IPSWICH TO TROWSE JUNCTION					
Down					Remarks
Approaching Trowse Jn	P		4		For trains starting from Ipswich
Approaching Trowse Jn	P		2		For trains starting between Liverpool Street and Colchester
Approaching Trowse Jn	E		2		
Up					Remarks
Approaching Europa Jn	E		1		

EA 1050 SHENFIELD TO SOUTHEND VICTORIA					
Down					Remarks
Approaching Wickford	E		1		
Approaching Southend Victoria	E		1		
Approaching Southend Victoria	E		4		For the use of SIMBIDS. Including (Sun) and (MO). See Engineering Access Statement for detailed timings
Up					Remarks
Approaching Wickford	E		1		Terminating trains only
Approaching Mountnessing Jn	E		1		
Approaching Mountnessing Jn	E		4		For the use of SIMBIDS. Including (Sun) and (MO). See Engineering Access Statement for detailed timings

EA 1060 WICKFORD JUNCTION TO SOUTHMINSTER					
Down					Remarks
Approaching Southminster	E		1		
Up					Remarks
Approaching Wickford	E		1		Terminating trains only

EA 1070 WITHAM JUNCTION TO BRAINTREE					
Down					Remarks
Approaching Braintree	E		1		
Up					Remarks
Approaching Witham	E		1		Terminating trains only

EA 1090 COLCHESTER JUNCTION TO CLACTON					
Down					Remarks
Approaching Thorpe-Le-Soken	E		1		
Approaching Clacton	E		1		
Up					Remarks
Approaching Thorpe Le Soken	E		1		Terminating trains only
Approaching Colchester	E		1		

<b>EA 1100 EAST GATE JUNCTION &amp; HYTHE JUNCTION TO COLCHESTER TOWN</b>					
<b>Down</b>					Remarks
Approaching Colchester Town	E		1		Applies to services starting from beyond Colchester (Main Line)
<b>Up</b>					Remarks
Approaching Colchester Main Line Station	E		1		Applies to services starting from beyond Colchester Town

<b>EA 1110 THORPE-LE-SOKEN TO WALTON-ON-THE-NAZE</b>					
<b>Down</b>					Remarks
Approaching Thorpe-le-Soken	E		1		
Approaching Walton-on-the-Naze	E		1		
<b>Up</b>					Remarks
Approaching Thorpe-le-Soken	E		1		

<b>EA 1120 MANNINGTREE TO HARWICH TOWN</b>					
<b>Down</b>					Remarks
Approaching Harwich International/ Parkeston Yard	E		1		
Approaching Harwich International	E		10		Single Line Working. See Engineering Access Statement for detailed timings
<b>Up</b>					Remarks
Approaching Manningtree	E		1		Terminating trains only
Approaching Manningtree	E		10		Single Line Working. See Engineering Access Statement for detailed timings

<b>EA 1150 CHANNELSEA SOUTH JUNCTION TO STRATFORD CENTRAL JUNCTION</b>					
<b>Up</b>					Remarks
Approaching Stratford Central Jn West	E		2		

<b>EA 1160 BETHNAL GREEN EAST JUNCTION TO BISHOPS STORTFORD</b>					
<b>Down</b>					Remarks
Approaching Broxbourne	E		1		
Approaching Bishops Stortford	E		1		
<b>Up</b>					Remarks
Approaching Tottenham Hale	E		1		
Approaching Hackney Downs	E		1		For pathing purposes may instead be applied approaching Clapton Junction on route EA 1200
Approaching Hackney Downs	P		1		(via Southbury) Between 0700 and 1000 Mondays to Fridays only

<b>EA 1161 BISHOPS STORTFORD TO ELY NORTH JUNCTION</b>					
<b>Down</b>					Remarks
Approaching Shepreth Branch Jn	E		1		From Audley End direction <b>For trains from Audley End only may be applied approaching Cambridge if required</b>
Approaching Ely Dock Junction	E		1		Applies to northbound trains terminating at Ely only
<b>Up</b>					Remarks
Approaching Stansted North Junction	E		1		Trains from Audley End and beyond only

<b>EA 1162 ELY NORTH JUNCTION TO KING'S LYNN</b>					
<b>Down</b>					Remarks
Approaching King's Lynn	E		1		
<b>Up</b>					Remarks
Approaching Ely North Jn	E		1		From Littleport direction

<b>EA 1200 CLAPTON JUNCTION TO CHINGFORD</b>					
<b>Up</b>					Remarks
Approaching Clapton Jn	P		1		All trains arriving at Liverpool Street between 07:00 and 10:00 (SX except Bank Holidays)
Approaching Clapton Junction	E		*		*Allowance usually applied approaching Hackney Downs on route EA 1160 may instead be applied approaching Clapton Junction. See EA 1160 for details

<b>EA 1210 BROXBORNE JUNCTION TO HERTFORD EAST</b>					
<b>Down</b>					Remarks
Approaching Hertford East	E		1		

<b>EA 1230 ROYSTON TO SHEPRETH BRANCH JUNCTION</b>					
<b>Down</b>					Remarks
Approaching Shepreth Branch Jn	E		1		

<b>EA 1280 STRATFORD CENTRAL JUNCTION TO COPPERMILL JUNCTION</b>					
<b>Down</b>					Remarks
Approaching Stratford Station	E		2		For passenger and ECS trains terminating at Stratford

<b>EA 1370 GOSPEL OAK TO BARKING TILBURY LINE JUNCTION WEST</b>					
<b>Up</b>					Remarks
Approaching Gospel Oak	E		1		

<b>EA 1390 BARKING TILBURY LINE JN EAST TO PITSEA JN (VIA TILBURY)</b>					
<b>Down</b>					Remarks
Approaching Pitsea	P		1		All trains from Thames Haven Jn
<b>Up</b>					Remarks
Approaching Ripple Lane Renwick Road	P		1		
Approaching Barking	P		1		All trains from Dagenham Dock.

<b>EA 1410 UPMINSTER TO WEST THURROCK JUNCTION</b>					
<b>Down</b>					Remarks
Approaching Ockendon	P		1		Terminating trains only
<b>Up</b>					Remarks
Approaching Upminster	P		1		All freight trains from Thames Haven Jn
Approaching Upminster	P		1		All trains off the Ockendon Branch

<b>EA 1430 EAST SUFFOLK JUNCTION TO OULTON BROAD NORTH JUNCTION</b>					
<b>Down</b>					Remarks
Approaching Saxmundham	E		1		
Approaching Oulton Broad North Jn	P		1		From Ipswich

<b>EA 1430 EAST SUFFOLK JUNCTION TO OULTON BROAD NORTH JUNCTION</b>					
<b>Up</b>					Remarks
Approaching Saxmundham	E		1		
Approaching Boss Hall Junction	E		1		

<b>EA 1440 WESTERFIELD JUNCTION TO FELIXSTOWE TOWN</b>					
<b>Down</b>					Remarks
Approaching Felixstowe Town	E		1		

<b>EA 1450 TRIMLEY TO FELIXSTOWE NORTH QUAY FREIGHTLINER TERMINAL</b>					
<b>Down</b>					Remarks
Approaching Felixstowe North	E		2		

<b>EA 1460 FELIXSTOWE BEACH JUNCTION TO FELIXSTOWE BEACH</b>					
<b>Down</b>					Remarks
Approaching Felixstowe Beach	E		2		

<b>EA 1470 NORWICH THORPE JUNCTION TO LOWESTOFT</b>					
<b>Down</b>					Remarks
Approaching Coke Ovens Junction	E		1		From Ipswich or Norwich
<b>Up</b>					Remarks
Approaching Norwich Thorpe Junction	E		1		From Lowestoft, Yarmouth and Sheringham

<b>EA 1490 CROMER TO SHERINGHAM</b>					
<b>Down</b>					Remarks
Approaching Sheringham	E		1		
Approaching Sheringham	P				Train operator to specify performance time

<b>EA 1500 BRUNDALL JUNCTION TO YARMOUTH</b>					
<b>Down</b>					Remarks
Approaching Yarmouth	E		1		

<b>EA 1510 REEDHAM JUNCTION TO YARMOUTH</b>					
<b>Down</b>					Remarks
Approaching Yarmouth	E		1		

<b>EA 1530 COLDHAM LANE JUNCTION TO HAUGHLEY JUNCTION</b>					
<b>Down (Eastbound)</b>					Remarks
Approaching Bury St Edmunds	E		1		
<b>Up (Westbound)</b>					Remarks
Approaching Bury St Edmunds	E		1		
Approaching Chippenham Jn	P		1		
Approaching Coldham Lane Jn	E		1		

<b>EA 1540 CHIPPENHAM JUNCTION TO ELY DOCK JUNCTION</b>					
<b>Down (Westbound)</b>					Remarks
Approaching Ely Dock Jn	E		1		Applies to all services

<b>EA 1560 ELY NORTH JUNCTION TO KINGS DYKE (INCLUSIVE)</b>					
<b>Down (Westbound)</b>					Remarks
Approaching Peterborough East Junction	E		2		

# **EA 1560 ELY NORTH JUNCTION TO KINGS DYKE (INCLUSIVE)**

<b>Up (Eastbound)</b>					Remarks
Approaching Ely North Junction	E		2		

# **EA 1580 ELY NORTH JUNCTION TO TROWSE JUNCTION**

<b>Down</b>					Remarks
Approaching Trowse Jn	E		1		From Thetford direction
<b>Up</b>					Remarks
Approaching Ely North Jn	E		1		From Thetford direction

## 6. Timetabling Considerations

### 6.1 Advertised and Working Times

It is not permissible for trains to be specified to be advertised to arrive before or depart after the booked times stated in the working timetable (WTT).

It is permissible for trains to be specified to be advertised to depart before the booked times stated in the working timetable in the following circumstances;

- (i) Where the WTT departure time is delayed to achieve the required headway behind a preceding train or margin following a conflicting move.
- (ii) As an aid to punctual departure where this practice has been agreed between the Train Operator and Network Rail.

By agreement between the Train Operator and Network Rail, trains may be specified to be advertised to arrive after the booked times stated in the WTT. This agreement is used instead of engineering/performance allowances.

### 6.2 Timing of Light Locomotives

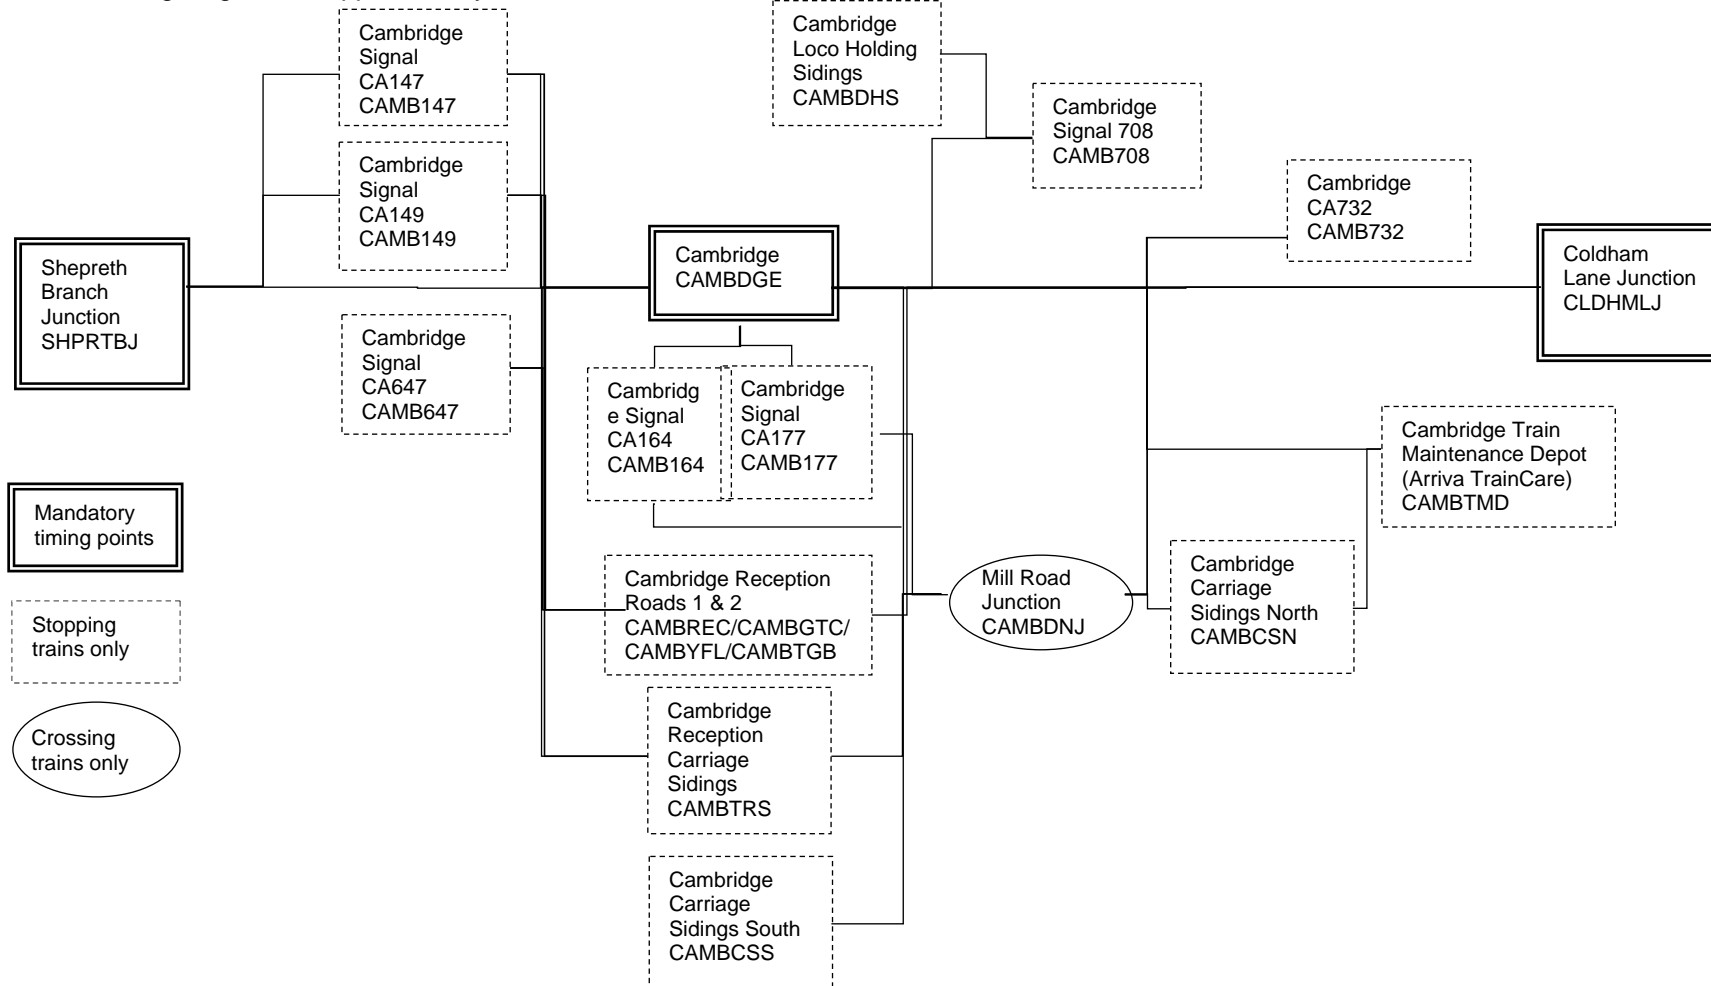

It is a general principle that all light locomotive movements will be timed. Any exceptions to this must be agreed by the appropriate Operational Planning Specialist.

### 6.3 Two–Track Timetable Railway

See Engineering Access Statement EA1010 & EA1011 Section 4 – Standard Possession Opportunities for details.

## Appendix A Timing Point Diagrams

The following diagram is supplementary to the information shown in section 2.1.

## Appendix B Route Code Diagrams

The following diagrams are supplementary to the information shown in section 2.1.

Down direction route codes to Cambridge

Down direction route codes from Cambridge

Up direction route codes to Cambridge

Up direction route codes from Cambridge
